Subject: PFAS Reporting List - Direction to Continue Reporting 36 PFAS

Jeff,

As you may be aware, the DNR recently adjusted the [PFAS default reporting list](#) for laboratory reporting and regulatory sampling from 36 to 33 PFAS compounds. As noted in the announcement, the DNR may direct regulated entities to continue reporting for the 36 PFAS compounds (NR 716.13). This email is to inform you that DNR directs JCI/Tyco to continue with sampling and reporting of 36 PFAS compounds for the site investigations being conducted by JCI/Tyco in the Marinette and Peshtigo area (BRRTS cases 02-38-580694, 02-38-581955, and 02-38-583856). Evaluation of the PFAS signature remains a critical component of these site investigations.

Please let us know if you have any questions.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
