Subject: Proposed Interim Actions Approval – Rail Lots (Former CN/WCL Railroad)
South 1st Avenue/East Sherman Avenue/West Thomas Street, Wausau
DNR BRRTS # 02-37-587000

Dear Mr. Meurette:

On October 6 2021, Arcadis U.S. Inc. submitted on the 3M Company's behalf an interim actions report for the southern portion of Lot 2, Railroad Right-of-Way. A technical assistance review fee was received in accordance with Wis. Admin. Code Ch. NR 749.04.

The Lot 2 Interim Actions Report (IAR) details plans for removal of likely contaminated soil and placement of a clean cover system to prevent direct contact with impacted soils. The Department understands that all excavated soils generated from this project will be profiled and disposed of at the Marathon County Landfill located in Ringle, Wisconsin.

The Department approves the proposed interim actions at the site. Within 60 days of completing the proposed actions, please submit construction documentation. Please include an operation and maintenance plan for the cover system in the documentation report. Outlined in the operation and maintenance plan shall outline all operation, monitoring, and maintenance activities, from design through case closure under Wis. Admin. Code Ch. NR 726.

Thank you for your continued efforts to protect and restore the environment. Please contact me with questions or comments regarding this letter.

Sincerely,

Matt Thompson
Hydrogeologist
