Subject: Department Review of Remedial Action Documentation Report  
Former CN/WCL RR Track (Lot 2), Thomas St. and S. 1<sup>st</sup> Ave., Wausau  
DNR BRRTS #: 02-37-587000

Dear Mr. Meurette:

The Wisconsin Department of Natural Resources (the "Department") received an as built report for remedial actions taken at the Former CN/WCL RR Track (Lot 2) project site (Site) dated February 2, 2022. The report was submitted on your behalf by Arcadis U.S., Inc. A fee for a response was received February 4, 2022, in accordance with Wis. Admin. Code § NR 724.15.

Determination

The Department approves the remedial actions implemented to limit risk of direct contact exposure to contaminated soil at the site. The Department understands that an operations and maintenance plan for this response action will be submitted at the time of case closure request, as additional remedial actions are planned for the project site.

Summary of Remedial Actions Taken

Drainage areas were created to facilitate stormwater drainage at the site. Interim remedial actions included excavation and capping of contaminated soils. The cap consists of 12 inches of clean soil and 12 inches of 4-inch sized gravel. Concrete trench drains were also installed between railroad ties at the southern end of the site.

The Department appreciates your efforts to reduce possible exposure to contamination at this site. If you have questions regarding this letter, please contact by phone at (715) 492-2304 or by email at [matthewa.thompson@wisconsin.gov](mailto:matthewa.thompson@wisconsin.gov).

Sincerely,

Matt Thompson
