RE: Scoping and Work Plan Submittal Change
        Marinette Marine Bldg 34, 1600 Ely Street, Marinette, WI
        BRRTS Activity #02-38-587281
   Fincantieri Marinette Marine, Marinette, Wisconsin

Dear Mr. Neste:

Marinette Marine Corporation d/b/a Fincantieri Marinette Marine (FMM) received the Wisconsin
Department of Natural Resources' letter dated March 9, 2021 related to certain obligations associated
with FMM's Building 34 and 35 at 1600 Ely Street, Marinette, WI. One item included in the March 9,
2021 letter is a request to submit a Site Investigation (SI) Work Plan by May 8, 2021.

As you are aware, this site is under active construction in the area where Buildings 34 and 35 are
currently being built. As part of the construction process, soils are being excavated to facilitate the
installation of the building foundations, subgrade utilities, and general regrades. This work is being
conducted under an approved soil management plan requiring analytical soil testing throughout the
process. Dewatering actions have also occurred to facilitate the excavating and constructing activities.

At this time, not all of the analytical results from the soil sampling conducted during beneficial reuse
activities are available for review and analysis. Scoping of future SI work would benefit from a review
of all available site analytical data and, as such, FMM requests that the submittal of the required SI
Work Plan be delayed until that information is available and a review can be completed. We anticipate
a delay of approximately 45 days.

Please let me know if you have any questions or need any additional information.

Sincerely,

Tom Carow
EHS Director
