Mr. David Mielke  
ChemDesign Products, Inc.  
2 Stanton Street  
Marinette, WI 54143

**Subject:** Reported Contamination at ChemDesign Products, Inc. Property,  
2 Stanton Street, Marinette, WI  
DNR BRRTS Activity # 02-38-583852  
DNR FID # 438008340

Dear Mr. Mielke:

On June 26, 2018 Arcadis US, Incorporated on behalf of Johnson Controls International, plc ("JCI") notified the Department of Natural Resources ("department") that PFAS was detected in the groundwater at the site described above. The department understands that ChemDesign Products, Inc. ("Chem Design") is a manufacturer of products containing PFAS at the site described above.

Information submitted to the department regarding this site indicates you have caused, currently possess, or control the discharge of a hazardous substance or other environmental pollution (hereafter referred to as "contamination") at the above-described site. "Site" refers to the property where the contamination occurred and any other property it has migrated to, as defined in Wisconsin Administrative Code ("Wis. Admin. Code") § NR 700.03(56).

This letter explains how to initiate the investigation and cleanup of contamination of the site, and how to access further information and assistance from the department. The longer contamination is left in the environment, the farther it can spread and the more it may cost to clean up. Quick action may lessen damage to your property and neighboring properties and reduce your costs in investigating and cleaning up the contamination.

**Legal Responsibilities:**

Persons meeting the definition of "responsible party" under § NR 700.03(51) must follow applicable law to address the discharge of a hazardous substance to the environment or other environmental pollution. Wisconsin Statutes ("Wis. Stats.") ch. 292 and Wis. Admin. Code chs. NR 700 through NR 754 provide specific requirements for undertaking appropriate response actions to address contamination, including requirements for emergency and interim actions, public information, site investigations, remedy selection, design and operation of remedial action systems, and case closure.

## General Recommendations for Responsible Parties:

The department recommends that you:

### *1. Hire a Qualified Environmental Consultant*

To ensure response actions you plan to undertake comply with Wisconsin law, you should hire an environmental consultant within **30 days**, by August 1, 2019 to meet the regulatory deadlines listed below. A delay in hiring an environmental consultant could result in you missing key submittal deadlines.

Hiring a consulting firm with staff that have the appropriate State of Wisconsin qualifications to supervise and certify the submittals is a critical component and necessary to meet your requirements. Further, an environmental consultant should be knowledgeable of Wisconsin's technical procedures and laws, and be able to answer questions regarding cleanup requirements. Required qualifications for environmental consultants are specified in Wis. Admin. Code ch. NR 712. Program guidance is available, see *Wis. Admin. Code ch. NR 712 Qualifications and Certifications, RR-081*.

### *2. Properly Submit Reports on Time with Required Information Included*

Wisconsin law includes timeframes for submitting technical documents and conducting work, as well as specifications for what should be included in those submittals. This letter provides a general overview of the timeframes and first steps to take for site investigation and cleanup. For an overview of timing requirements, please refer to *NR 700 Process and Timeline Overview, RR-967, enclosed*.

The department developed the publication *Guidance for Electronic Submittals for the Remediation and Redevelopment Program, RR-690*, to assist responsible parties and consultants in properly submitting documents. Wis. Admin. Code § NR 700.11(3g), and other specific provisions within Wis. Admin. Code ch. NR 700, outline the requirements for submittals, including electronic submittals. Consultants and representatives of responsible parties are required to submit one paper copy and one electronic copy of submittals, including case closure documents. The electronic version must be an exact duplicate of the paper version. Failure to submit both a paper copy and electronic copy delays acceptance of your submittals.

### *3. Consider the Benefits of a Fee-based Technical Review of your Submittals*

In-depth department review of technical reports and submittals is available for a fee. The Remediation and Redevelopment (RR) Program project managers are available throughout the process to answer general questions and provide general input as the site moves toward closure. However, if you want a formal written response from the department, a meeting or both on a specific submittal, a review fee will be required in accordance with Wis. Admin. Code ch. NR 749. **Obtaining technical assistance from department project managers throughout the process is an effective way to prevent problems and delays at the end of the process when case closure is requested.** Forms, a fee schedule, and further information on technical assistance is available at [dnr.wi.gov](http://dnr.wi.gov) and searching "brownfield fees".

## Required Steps to Take and Documents to Submit:

The steps listed below serve as a general overview only — all mandatory steps and submittals specified in state law must be met before the department can grant "case closure", which is a

determination by the department that no further cleanup is necessary at a site, as defined in Wis. Admin. Code § NR 700.03(3m).

1. **Scoping and Work Plan Submittal – NR 716.07 and 716.09:** The law requires that you appropriately scope out your site investigation and submit a work plan within **60 days of this notification**, by September 2, 2019 for completing a site investigation. The work plan must comply with the requirements in Wis. Admin. Code, chs. NR 700 through NR 754. For additional assistance, the department has extensive guidance on its web page at [dnr.wi.gov](http://dnr.wi.gov) and search “brownfield publications”.

Prior to and during a site investigation, you must evaluate whether any interim actions are needed to contain or stabilize a hazardous substance discharge or environmental pollution, pursuant to Wis. Admin. Code § NR 708.11. If you undertake an interim action (e.g., free product removal), you must submit documentation of the action per Wis. Admin. Code § NR 708.15.

As you develop the site investigation work plan, you must include an assessment of the vapor intrusion pathway. Wis. Admin. Code § NR 716.11(5) outlines the requirements for when to evaluate for the presence of vapors in the sub-surface and in indoor air. The results and conclusions from the vapor assessment must be included in the Wis. Admin. Code § NR 716.15 site investigation report whether or not you elected to take vapor samples. *Addressing Vapor Intrusion at Remediation & Redevelopment Sites in Wisconsin, RR-800*, is available to help responsible parties and their consultants comply with these requirements.

2. **Field Investigation – NR 716.11:** Following submission of the work plan, the site investigation must be started within the timeframe provided under law. The timeframe varies depending on whether you are requesting the department’s fee-based review of the work plan. If you do not request a fee-based review of the work plan, you must initiate the field investigation within 90 days of submitting the work plan, and you may proceed with the field investigation upon department notification to proceed; however, if the department has not responded within 30 days, from submittal of the work plan, you may then proceed with the field investigation. If a fee and request for department review of the work plan is submitted, the field investigation must begin within 60 days after receiving department approval.
3. **Sample Results Notification Requirements – NR 716.14:** You must report sampling results to the department, owners, occupants, and various other parties within 10 business days after receiving the sampling results, unless a different timeframe is approved by the department, in accordance with Wis. Admin. Code § NR 716.14.
4. **Site Investigation Report – NR 716.15:** Within 60 days after completion of the field investigation and receipt of the laboratory data, the law requires you to submit a Site Investigation Report (SIR) to the department. As part of the SIR or in the Remedial Actions Options Report (RAOR), if there is soil contamination, the responsible party shall identify the current land use (i.e., industrial or non-industrial) and zoning for the site or facility in accordance with Wis. Admin. Code § NR 720.05(5). Also, as part of the SIR or in the RAOR, you must include any interim action report that may be required under Wis. Admin. Code § NR 708.15.
5. **Remedial Actions Options Report – NR 722:** Within 60 days after submitting the SIR, the law requires you to submit a RAOR. The selected remedy in the RAOR should include an evaluation of

green and sustainable remediation criteria, as appropriate, as required by Wis. Admin. Code § NR 722.09(2m). This may be submitted as part of a broader SIR.

6. **Remedial and Interim Action Design, Implementation, Operation, Maintenance and Monitoring Reports – NR 724**: Unless otherwise directed by the department, the responsible party shall submit all plans and reports required in Wis. Admin. Code ch. NR 724.
7. **Notification of Residual Contamination or Continuing Obligations – NR 725**: In situations where notification is required, the responsible party must provide submittal(s) that confirms that continuing obligations have been identified and affected property owners have been notified by the responsible parties 30 days prior to case closure, as required by Wis. Admin. Code ch. NR 725.
8. **Semi-annual Reporting -- NR 700.11**: Wis. Admin. Code § NR 700.11(1)(a) requires responsible parties to submit semi-annual site progress reports to the department until final case closure is granted. The reports summarize the work completed over six months and additional work planned to adequately complete the response action at the site. Consultants may submit these reports on behalf of responsible parties. These reports are due in January and July of each year. Please refer to department publication *NR 700 Semi-Annual Site Progress Report, RR-082*, for more information.

#### Submittals required under Wis. Admin. Code chs. NR 700 - 726

These documents, as applicable, must be submitted to the department prior to the responsible party requesting case closure, unless otherwise directed by the department:

- Ch. NR 708 reports and documentation for any immediate or interim actions.
- Ch. NR 712 professional certifications and signatures are included with applicable submittals.
- Ch. NR 716 work plan(s) and site investigation report.
- Ch. NR 722 remedial action options report (exception is for Dry Cleaners Environmental Response Fund sites), with the selected remedial action identified.
- Ch. NR 724 design, construction documentation, operation, maintenance and monitoring plans and reports, including vapor mitigation commissioning.
- Ch. NR 725 submittal(s) that confirms that continuing obligations have been identified and affected property owners have been notified by the responsible parties 30 days prior to case closure.
- If requesting case closure, the Ch. NR 726 case closure form and documentation substantiating compliance with the NR 700 rule series.
- Ch. NR 749 fees have been paid, as applicable, including closure and database fees.
- Ch. NR 700 semi-annual site progress reports starting six months after notification.

#### **Request for Site Information**

In addition, **within 60 days**, the Department requests ChemDesign provide information related to past and present production, usage, management, transportation, or disposal of PFAS compounds at 1 Stanton Street, Marinette, Wisconsin. This information is required to evaluate potential discharges of PFAS at or from 1 Stanton Street, and ChemDesign's ability to perform corrective action. The Department requests this information under the authority of Wis. Stats. §§ 292.11(8) and 292.31(1), and requests that you provide the information in Wis. Stats. §§ 292.31(1)d(1) through (3):

*(d) Access to information. Upon the request of any officer, employee or authorized representative of the department, any person who generated, transported, treated, stored or disposed of solid or hazardous waste which may have been disposed of at a site or facility under investigation by the department shall provide the officer, employee or authorized representative access to any records or documents in that person's custody, possession or control which relate to:*

- 1. The type and quantity of waste generated, transported, treated or stored which was disposed of at the site or facility and the dates of these activities.*
- 2. The identity of persons who generated, transported, treated or stored waste which was disposed of at the site or facility.*
- 3. The identity of subsidiary or parent corporations, as defined in sub. (8) (a) 3., of persons who generated, transported, treated or stored waste which was disposed of at the site or facility.*

Specifically, the Department requests response to the following items:

1. Describe the use and manufacture of PFAS or PFAS-containing materials at the facility from the receipt of the material to the final use, sale or disposal of PFAS or PFAS-containing materials. Include in that the description the information on all entities responsible for its manufacture and use; the years involved in its manufacture and use; what it was used to manufacture; whether any product containing PFAS was used or tested at the facility; the areas of the facility where it was manufactured and used; and whether it was emitted from any air emission sources.
2. Describe, using generic and trade names, the materials containing PFAS that were transported to or from, disposed of, stored, produced, used, handled, managed, or processed at or related to the Facility. The description should include the physical form (solid, liquid, gas) of any materials and the type of container used to transport, store, produce, use, handle, manage, or process the PFAS.
3. Describe the transportation to or from, production, disposal off, storage, use, handling, management, and processing of PFAS-containing material related to the Facility. Include in each description where and in what process at the Facility the transportation to or from, disposal storage, use, handling, management, and processing of PFAS-containing material occurred at the Facility. *E.g.*, the material was disposed of in landfill, drained to soil sewer drain, etc. If the point of transportation to or from, production of, disposal of, storage, use, handling, management, or processing of PFAS-containing material changed over time, please provide dates of such changes and what changes were made.
4. Estimate the amounts of PFAS-containing materials that were transported to or from, disposed of, stored, produced, handled, managed, or processed at or related to the Facility.
5. Identify which part of ChemDesign's operations, including storage, involving PFAS or PFAS-containing materials, generated waste, including but not limited to wastes resulting from spills of liquid materials and wastes generated by cleaning and maintenance of equipment, inventory cleanout, off-specification determined wastes and machinery. Include locations where the waste was generated and stored, and an estimation of the volume or mass of the waste generated and stored.

6. Identify discharges of PFAS or PFAS-containing materials and describe the methods used to clean up the discharges including but not limited to:
  - a. The types of materials spilled,
  - b. The media onto or into which the spill occurred,
  - c. The materials used to clean up those spills,
  - d. The methods used to clean up those spills, and
  - e. Where the materials used to clean up those spills were disposed of.
7. Describe the cleaning and maintenance of equipment and machinery involved in PFAS operations, including but not limited to:
  - a. The types of materials used to clean and maintain this equipment/machinery,
  - b. The monthly or annual quantity of each such material used,
  - c. The disposition of those materials used in cleaning equipment, and
  - d. Where the materials are/were disposed of.
8. Was there ever a spill, leak, release, or discharge of PFAS into any subsurface disposal system or floor drain inside or under the buildings within the facility, or that may have migrated from the facility? If so, identify:
  - a. Where the disposal system or floor drains were located,
  - b. Whether the disposal system or floor drains were connected to pipes,
  - c. Where such pipes were located and emptied,
  - d. Whether such pipes ever leaked or in any way discharged the substances into the environment.
9. Identify all entities who transported reject water from the Groundwater Collection and Treatment System (GWCTS) and the location(s) where reject water was disposed. Provide information regarding dates and volumes of reject water sent off-site for disposal.
10. Was there ever an application of PFAS or PFAS-containing material, including Aqueous Film Forming Foams (AFFF) and Alcohol Resistant-AFFF to the ground for fire training purposes or to extinguish a fire? If so, identify:
  - a. Where the fire or fire training occurred,
  - b. When the fire occurred,
  - c. The range of dates when fire training occurred,  
estimate the volume of PFAS or PFAS-containing materials were applied to the ground.

This information request applies to data and information that you or others may have collected prior to, or during, ownership of the Property. Please provide any additional information that may aid in determining the source(s) of PFAS discharge. Please send the information to David Neste at 625 E County Road Y, Suite 700, Oshkosh WI 54901-9731.

The "confidentiality of information" provisions are found in s. NR 700.05, Wis. Admin. Code. To maintain any of the information that ChemDesign has or will submit to the Department as confidential, ChemDesign would need to request that the specific information be kept confidential and provide sufficient information to the Department to make such a determination, in accordance with that provision.

**Additional Information:**

The department tracks information on all cleanup sites in a department database available at [dnr.wi.gov](http://dnr.wi.gov) and search "BOTW". The Bureau for Remediation and Redevelopment Tracking System (BRRTS) identification number for this site is listed at the top of this letter. You may view information related to your site on this database at any time.

All correspondence regarding this site should be directed to:

Dave Neste  
Remediation and Redevelopment Program  
Wisconsin Department of Natural Resources  
625 E. County Road Y, Suite 700  
Oshkosh, WI 54901  
[david.neste@wisconsin.gov](mailto:david.neste@wisconsin.gov)

As previously noted, you are required to submit one paper copy and one electronic copy of plans and reports. To speed up processing, your correspondence should reference the BRRTS and Facility Identification (FID) numbers (if assigned) listed at the top of this letter.

Please visit the department's Remediation and Redevelopment Program website at [dnr.wi.gov](http://dnr.wi.gov) and search "Brownfields", for information on selecting a consultant, seeking financial assistance, and understanding the investigation and cleanup process. Information regarding review fees, liability clarification letters, post-cleanup liability and more is also available.

Information on the NR 700 process and selecting a consultant is enclosed.

If you have questions, please call the Dave Neste at (920) 424-0399 for more information.

Thank you for your cooperation.

Sincerely,

Christine Haag  
Program Director - Remediation & Redevelopment Program

# Environmental Contamination: The Basics

RR-674

September 2014

In an industrialized society like ours, a wide variety of contaminants are discharged to the environment every day from residential, commercial and industrial sources. Many of these discharges may not pose a threat to the public and the environment. However, a significant discharge of a contaminant or hazardous substance has the potential to impact human health or the environment. When a significant discharge occurs, the Wisconsin Department of Natural Resources (DNR), particularly the Remediation and Redevelopment Program (RR Program), provides oversight and assistance in making sure the public and the environment are protected.

A **Hazardous Substance**, as defined in s. 292.01, Wis. Stats., means any substance or combination of substances, including any waste of a solid, semisolid, liquid or gaseous form which may cause or significantly contribute to an increase in the mortality or an increase in serious irreversible or incapacitating reversible illness, or which may pose a substantial present or potential hazard to human health or the environment because of its quality, concentration or physical, chemical or infectious characteristics. This term includes, but is not limited to, substances that are toxic, corrosive, flammable, irritants, strong sensitizers or explosives as determined by the DNR.

## What is the RR Program?

The RR Program becomes involved when a discharge of a hazardous or potentially hazardous substance occurs to the lands, waters or air in the State of Wisconsin. When a discharge is reported, the RR Program evaluates the severity of the discharge and, if necessary, ensures that the proper cleanup procedures are followed to minimize any threat to human health or the environment.

The RR Program also provides technical and regulatory assistance to public and private parties looking for information, investigating and cleaning up properties with real or perceived contamination. In certain circumstances, the DNR is required to charge a fee for technical assistance. Attention is provided to abandoned or underutilized properties, known as *brownfields*, in an effort to return these properties back to productive use. This effort also promotes the revitalization of blighted areas, as well as the reuse or redevelopment of properties already located in urban areas in order to preserve undeveloped land, also referred to as *greenfields*.

## Why should I be concerned?

Not only is it a legal requirement to take necessary steps to address contamination, but contamination can have an adverse impact on human health and the environment. It can take many forms and can occur anywhere. In Wisconsin, two major concerns for environmental and public health impacts from contamination are the degradation of groundwater and vapor intrusion of chemicals. Soil, air and surface water contamination are also areas of concern. When a discharge to the environment has been identified, the DNR is mandated by state law to require response actions that are protective of human health, safety and welfare, and to restore the environment to the extent practicable.

An individual or local government may assume liability for environmental cleanups by acquiring a contaminated property, although there are exemptions for local governments that acquire properties by certain

Wisconsin Department of Natural Resources  
PO Box 7921, Madison, WI 53707  
dnr.wi.gov, search "Brownfield"

means. The Wisconsin Supreme Court has determined that if you own a contaminated property where contaminants are continuing to migrate, then you may be responsible for cleaning it up, even if you did not cause the contamination, because you are interpreted as having “possession and control” of the discharge.

Stressed vegetation, stained soils, odors, a sheen on the surface of water or a strange taste to water are often obvious indicators of a potential discharge or environmental problem. In addition to these more obvious factors, historical property usage such as plating operations, dry cleaners or engine repairs could also be indicative of other hidden environmental problems. For example, a serious environmental problem that is hard to detect is leakage from an underground storage tank (UST). Unless good records are kept regarding product usage, underground leaks are hard to identify.

### **What is a discharge?**

A discharge to the environment is defined in s. 292.01, Wis. Stats., and means, but is not limited to, spilling, leaking, pumping, pouring, emitting, emptying or dumping. To obtain more information on what constitutes a hazardous substance discharge, refer to the Regulations listed in the “For more information” section on page three.

### **How is a discharge discovered?**

Discharges to the environment are discovered in several ways. The most common methods of discovery are visual observation while the discharge is taking place (i.e. a leaking gas pump) or historical discharges discovered during building expansion or demolition, road construction activities, utility repairs or tank removal or upgrade activities.

Discharges can also be discovered at the time of property transfer if a potential buyer requests a Phase I or Phase II Environmental Site Assessment (ESA). A Phase I ESA consists of a historical search and identifies current and past property usage and areas of potential environmental concern. A Phase II ESA consists of collecting soil and groundwater samples at the property from those areas identified in the Phase I ESA with suspected or known contamination (i.e. areas of drum storage, stressed vegetation, stained soils, above and below ground storage tanks, etc.).

### **When do I need to report a discharge?**

According to the “Spill Law,” s. 292.11, Wis. Stats., persons who cause, possess or control the discharge of a hazardous substance that adversely impacts, or threatens to adversely impact public health, welfare or the environment must immediately report the discharge to the DNR. Generally, this responsibility falls upon the current property owner. **Emergency spills must be immediately reported by calling the DNR 24-hour toll free Spill Hotline at 1-800-943-0003.** Non-emergency discharges discovered via a tank removal or environmental testing can be reported by completing and submitting the *Notification for Hazardous Substance Discharge* form (4400-225) or visiting your DNR regional headquarters in person during normal business hours (please see page 4 for contact information). If the testing was done as part of a Phase II ESA, report the discharge immediately upon discovery. Do not wait until a Phase II ESA report is completed to report a spill.

### **What happens next?**

Once the DNR has been notified that contamination exists at a site, the DNR will inform the responsible party by telephone or mail if any further actions are needed. The range of actions is defined in the NR 700 rule series (referenced in the “For more information” section). The responsible party is then, in most cases, issued a responsible party letter that outlines legal responsibilities for addressing contamination. The letter will ask

the responsible party to hire a qualified environmental consultant. The consultant will submit a work plan that details how they will investigate the degree and extent of the contamination (if necessary, across property boundaries) by collecting soil or groundwater samples.

After determining the degree and extent of the contamination, the environmental consultant will prepare a site investigation report that summarizes the results of their findings. Typically, the consultant will also provide a cleanup strategy in this report. Cleanup measures are then undertaken by the consultant on behalf of the responsible party to restore the environment.

Once the site appears to meet all regulatory requirements, the consultant will prepare a closure request for DNR submittal. Once the appropriate fee has been submitted, the DNR reviews the closure request and determines whether or not the site has been cleaned up to acceptable levels. If closure is appropriate, the DNR or any other state agency with jurisdiction over the case will issue a closure letter indicating that the responsible party has complied with the conditions of closure.

**What is a “Responsible Party?”**

A responsible party is an individual or public or private entity who causes a discharge of a hazardous substance or who possesses or controls a hazardous substance which is discharged. The responsible party is legally required under Wisconsin’s Spill Law to notify the DNR of the discharge and to investigate and remediate the environment. There may be more than one responsible party at a site.

**What is the role of an environmental consultant?**

When the DNR informs you that you need to address contamination, you will be requested to hire the services of a professional environmental consultant. The role of the environmental consultant is to determine the most appropriate and cost effective way to investigate and remediate the contaminated site. The consultant should act as a representative for the responsible party on technical matters and should have a thorough understanding of regulatory requirements. It is important to feel comfortable with your environmental consultant, as they will be working closely with you and the DNR. Qualifications for environmental consultants are specified in ch. NR 712, Wis. Admin. Code. More information can be found in *Selecting an Environmental Consultant* (RR-502) at [dnr.wi.gov/files/PDF/pubs/rr/RR502.pdf](http://dnr.wi.gov/files/PDF/pubs/rr/RR502.pdf).

**For more information...**

The RR Program web site has many features to assist you. For example, you can locate DNR staff contacts, access DNR publications, obtain environmental information on specific properties or find information on financial incentives. The web site can be found at [dnr.wi.gov/topic/Brownfields](http://dnr.wi.gov/topic/Brownfields).

The following are just a few of the DNR resources can be found on the RR Program web site:

Information on Contaminated Sites:

- *BRRTS on the Web*, the RR Program’s list of open (still investigating) and closed (cleanup completed) contaminated sites in Wisconsin. [dnr.wi.gov/topic/Brownfields/botw.html](http://dnr.wi.gov/topic/Brownfields/botw.html)
- *RR Sites Map*, the RR Program’s web-based mapping system for contaminated and cleaned up sites [dnr.wi.gov/topic/Brownfields/rasm.html](http://dnr.wi.gov/topic/Brownfields/rasm.html)

In addition, appointments to view paper copies of DNR files can be made by contacting your DNR regional headquarters at the telephone numbers listed below during normal business hours. Please be aware that some of our services require a fee. Please see our web site at [dnr.wi.gov/topic/Brownfields/Fees.html](http://dnr.wi.gov/topic/Brownfields/Fees.html) for more information on fees.

## Selecting an Environmental Consultant

### Purpose

The purpose of this document is to assist responsible parties in selecting a qualified environmental consultant. The document outlines the steps of hiring an environmental consultant, including potential questions to ask a consultant before hiring.

### Why do I need a consultant?

If the Wisconsin Department of Natural Resources (DNR) notified you of your responsibility for the investigation and cleanup of soil, groundwater or other contaminated media under Wis. Stat. ch. 292, it is recommended that qualified professionals be hired to complete the required work. Wis. Admin. Code ch. NR 712 establishes qualifications for environmental consultants performing this type of work in Wisconsin.

Site investigations and cleanup of contamination or environmental pollution can be complex and costly. A qualified environmental consultant can help with investigating and cleaning up your property in accordance with state and federal regulations and act as a liaison between you and the DNR's Remediation and Redevelopment program (RR) staff.

A qualified, experienced consultant can:

- save time, money, and complete the project right the first time;
- help establish a cooperative relationship with regulatory agencies; and
- minimize down time for your business or land use.

Further, Wis. Admin. Code ch. NR 712 requires that some specific environmental work at a site be conducted by persons meeting certain qualifications.

### How can I find a qualified consultant?

The DNR cannot endorse a specific environmental consultant or firm. However, the agency maintains a list of consultants who have identified themselves as doing environmental work in Wisconsin; see the DNR publication RR-024 "Environmental Services Contractors List." Other means of finding or selecting a consultant include calling businesses that have done environmental cleanups, contacting professional associations in which you are a member, or searching "environmental services" or "environmental engineers" on the web.

### What should I tell a consultant when requesting a quote for services?

Tell the potential consultant as much as you can about your property. This will allow them to respond with a quote for the appropriate services. Information to provide to a potential consultant could include:

- the site history, including what types of businesses or land uses have existed at the property;
- materials and products used;
- materials and wastes that have been stored, recycled or disposed of;
- potential areas of contamination (e.g. the site of a previous disposal tank);
- current use of surrounding properties;

- requirements for the investigation and cleanup given by the DNR under Wis. Stat. ch. 292 and Wis. Admin. Code chs. NR 700 - 754;
- if you are in a state reimbursement program that may assist with the costs of investigation or cleanup; and
- the source of your water supply.

### **What should I ask a consultant?**

When soliciting quotes for service, you may want to ask the potential consultant about their firm and experience, including:

- whether their staff meet the professional qualifications required in Wis. Admin. Code ch. NR 712 (e.g. whether any of their staff are licensed and registered as professional engineers and/or registered as hydrogeologists with the Wisconsin Department of Safety and Professional Services);
- how many years of experience they have doing environmental work in Wisconsin;
- how many similar investigations and cleanups they have completed in Wisconsin or elsewhere (cleaning up a leaking petroleum tank can be very different from cleaning up hazardous waste);
- what administrative rules they expect to follow (if a potential consultant is not familiar with the Wis. Admin. Code chs. NR 700-754, governing environmental cleanups or Wis. Admin. Code ch. NR 140, governing groundwater standards, it is an indication that they are not familiar with Wisconsin regulations);
- what level of insurance they carry for errors, omissions, and liability;
- whether they will help prepare requests for reimbursement if your cleanup is eligible; and
- whether they can provide references for you to contact.

Don't hesitate to ask a potential consultant why their approach to your environmental cleanup would differ from other consultants.

### **What questions should I ask when checking a consultant's references?**

When checking the references of a potential consultant, you may want to ask the following questions:

- What tasks did the consultant perform for you, what was the size of the project, and what type of contamination did the consultant address (to compare how similar their project is to yours)?
- Did the consultant stay on schedule, or provide reasonable explanations for delays?
- Did the consultant keep you informed of the project's status, new developments and options for cleanup?
- If problems arose, were they resolved to your satisfaction?
- Did the consultant work effectively with the DNR (and local officials if relevant)?
- Were invoices or payment requests clear and timely?
- Did the consultant request approval in advance of billing for all significant changes to the original cost estimate?

### **What should I expect for the cost of a cleanup?**

Costs for environmental cleanup vary widely based on the type and extent of contamination and the regulatory requirements. Ask the consultant what to expect for your situation. You may also want to ask these questions:

- Will subcontractors submit competitive bids?
- What hourly rates and overhead apply to professional staff?

- What are the per diem charges for staff doing field work?
- How often will I be billed?
- How will bills be itemized?

Watch for cost estimates that are significantly higher or lower than those received from other consultants. Ask those consultants how they can get the job done more economically, or whether they think proposals from other consultants are incomplete. Also compare proposed schedules for completion of work. There may be good reasons for faster cleanups, but make sure to understand those reasons. Sometimes the least disruptive and least costly cleanups, such as natural attenuation of contamination, take the longest.

It is important to understand the terms of a contract before signing, including who will be responsible for the work and the timing. Clarify that any changes in cost or work should be approved by you first, and that the contract includes language that allows contract termination at any time if you are not satisfied with the consultant's work.

### **Is financial help available?**

Financial assistance may be available depending on your situation. Wisconsin offers certain loans, grants and reimbursement programs for various types of cleanups. Ask your consultant if you might be eligible for financial aid, and whether they have experience with these programs. For more information on available financial programs, visit [dnr.wi.gov](http://dnr.wi.gov) and search "brownfields".

### **What else should I know?**

Wisconsin has numerous options to complete an environmental cleanup while enhancing the redevelopment and resale potential of your property. An experienced consultant can help to identify the best cleanup approach while meeting your business needs.

The DNR can also provide information and assistance. Please visit the Remediation and Redevelopment (RR) program website at [dnr.wi.gov](http://dnr.wi.gov) and search "brownfields" for more information on cleanups, financial assistance, liability tools and more. You may also want to review cleanup related DNR publications such as, *Environmental Contamination Basics, RR-674* and *Brownfields Basics – Tools for Cleaning Up and Redeveloping Contaminated Properties, RR-663*.
