SUBJECT: Contamination Detected in Well #7 (WDNR BRRTS #02-44-584094)

Dear Carrie Stoltz:

This letter is in response to the letter you sent us dated July 25, 2019.

Ponsse North America purchased this property from the Oneida County airport in 2002. We had the current structures constructed on the land after we purchased it. We do not currently, nor have we used or stored in the past, PFAS compounds.

The current use of our land is for our service/sales shop. We sell logging equipment, repair the machines and sell the parts for the machines at this location. There is no manufacturing of the machines on this property, nor has there been since we have been here.

We are unaware of any documented hazardous substance spills, groundwater or surface water contamination or any environmental investigations or remediation efforts to report from our property.

Sincerely,

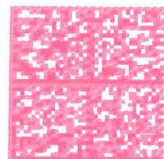

Pekka Ruuskanen
Managing Director
Ponsse North America
