Subject: RE: Green Bay & Western Rail (frmr) - Area Wide Fill - BRRTS # 02-05-579141

Hi Keld,

The City is currently working on finalizing the redevelopment plans for the GB and Western site. As part of the redevelopment, the entire site will be capped to address any potential for direct contact. The first phase of the project, filling the site to bring it out of the flood fringe, is expected to begin this fall. This will involve importing clean fill from off-site onto the property. If any contaminated soil is excavated and reused on the site, a Soil Management Plan will be submitted for approval. If you need any additional information, please let me know. Thanks,

Lynelle Caine

Matt/Lynelle,

Can you please provide a general status update and likely timelines for the above referenced site.

Thanks,

-Keld
