Erika
I have reviewed the October 15, 2019 ATC Transformer Fire Work Plan written by AECOM. I believe we should implement the workplan as submitted. The goal of the investigation is to determine the extent of PFAS impacts as a result of the July 19 fire fighting activities. The soil, surface water and groundwater field work will move us towards that goal. The work can begin as soon as possible.

When the site investigation report is complete, the Department will review the report and determine what, if any, further investigation or remedial actions are required.

Please contact me with any questions or concerns.

Mike
