Subject: SIWP Revisions Request - Feedback on Process

Jeff and Scott - Thank you for letting us know that revisions are forthcoming to these two work plans. Once the revised versions are received, the original versions will be removed from BRRS on the Web, and a note will be added to say that the Work Plan has been replaced by the revised version dated “ ____”. The review fees JCI/Tyco previously submitted for each work plan will be transferred to the corresponding revision, and the DNR’s review and response will be based on the revised documents.

Subject: RE: Data Submittals

Alyssa/Bridget:

Just to clarify, Tyco is asking that the two documents referenced below be pulled for your review list and returned to Tyco. As discussed this week, with our focus toward planning and potentially implementing some remedial actions we feel there are some necessary modifications to these work plans. Please let me know if you have questions.
