Nor-lake Soil & Groundwater Remediation
727 2nd Street, Hudson, WI
DNR BRRTS Activity # 02-56-000089
FID #: 656009420

Dear Mr. Lonnau:

The Department of Natural Resources (the "Department") is in receipt of the Interim Progress Report (Report) submitted on January 19, 2021. The purpose of the Report was to address the Case Closure under Wis. Admin. Code Ch. NR 726 Not Recommended letter dated September 29, 2020.

The following sections were addressed and deemed satisfactory by the department:

- Additional Vapor Investigation Item #1, #2a, and #2c-d
- Indoor Air Item #2a-b
- Potential off-site receptors Item #3

However, the requirement for sampling of 1,4-Dioxane in groundwater has not been met. Sampling for 1,4-Dioxane is needed to establish compliance with the closure criteria of Wis. Admin Code § NR 726.05 (6).

If you have any questions regarding the information in this letter or would like to schedule a meeting to discuss this case, please contact the DNR project manager, Candace Sykora at 715-928-0452 and or candace.sykora@wisconsin.gov. For more information on the closure reconsideration process, please see DNR publication, RR-102, "Wis. Admin. Code ch. NR 726 Case Closure Reconsideration Process" by visiting dnr.wi.gov, search: RR-102, for more information.

The DNR appreciates your efforts to restore the environment at this site.

Sincerely,

A handwritten signature in black ink that reads "Candace Sykora". The signature is written in a cursive, flowing style.

Candace Sykora
