Hi Robert,

Thank you for speaking with me today concerning the above-referenced site. On 02/22, the DNR received, *Proposed Additional Vapor Mitigation System Commissioning Plan* (report) for the above referenced site. The report requests a DNR review of the additional commissioning plan by 02/28. During our phone conversation today you informed me that the additional commissioning outlined in the report has already been completed, and that a DNR response to the report is now requested by 03/31, as the next commissioning activities at the site will likely occur in April. Therefore, the DNR's goal is to provide a review and response to the report by 03/31. Please let me know if you have any comments or questions.

Best, Jane
