**To:** Travis W. Peterson  
**Subject:** Mercury Marine Plant No. 1 site (02-46-588930)

Travis,

Thanks for taking the time to speak with me over the phone today.

Based on our conversation, it's my understanding that one round of vapor sampling has been conducted in the newly constructed buildings at the Mercury Marine Plant No. 1 site (02-46-588930), and that an additional round of sampling is planned for February of 2024. It's also my understanding that none of the buildings on the site are currently occupied, and that the earliest scheduled occupancy is in April of 2024.

As discussed during our phone call, please submit the results of the first round of vapor sampling to the DNR as soon as practical, and submit a report with both sets of results after the second round of sampling is completed.

Please let me know if your understanding on any of the topics above differs from mine.

Thank you,  
Connor
