Citizen Resolution # 210122
(For Hearing Officer completion)

**Bonus Antlerless Deer Harvest Authorizations Random Drawing**

The problem: The current system of awarding bonus antlerless deer harvest authorizations/tags on a first-come first-served basis in counties with limited available tags (not issued with licenses) is biased against those applicants who are unable to access computers, smart phones, or visit a sporting goods retail establishment that offers such service. Persons who are employed at jobs where they are unable to login to the application system or visit license outlets at a precise time of day, persons who do not possess the required technology, or are not as technologically adept (especially the elderly) are at a definite disadvantage in the application process. The solution: The department should award bonus antlerless deer harvest authorizations through a random drawing system similar to that used to award permits for bear, bobcat, wolf, fisher, turkey and elk tags. Changing to a draw system similar to that used for other limited harvest opportunities would eliminate those disadvantages and make the system equitable to all. **BE IT RESOLVED** that the Forest County Conservation Congress recommends the following question be presented on the online spring hearings in April, 2022.

**Would you support a process to award Bonus Antlerless Deer Harvest Authorizations via a random drawing system similar to systems currently in use for bobcat, elk, turkey, wolf, fisher, and bear in counties with limited available authorizations?**
