

Hunting for Sustainability

Do you want to know where your food comes from? Are you interested in ethical, sustainable, healthy sources of meat? This is a great opportunity for **ADULTS** in the Rhinelander area to learn how to hunt white-tailed deer. This program will focus on nature and conservation along with field-to-table culinary experiences.

No deer hunting experience required. Open to adults who haven't purchased a deer-hunting license in the past. Women are encouraged to participate. No cost to participate and all equipment is provided.

Participants will learn to scout, hunt, and process your own game under the supervision of experienced mentors.
