

Notice: Individuals are required to provide information on this form to request a permit to operate a generator on Department property, as specified in NR 45.04(3)(e). Wis. Admin. Code. Personally identifiable information collected will be used for program administration and may be made available to requesters under Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

Generator use is typically not allowed in Wisconsin State Parks. This permit allows you to use a generator at your campsite with the following restrictions:

- I am requesting this permit due to the fact that I have a medical or physical condition that requires electrical current.
- I understand it is my responsibility that the noise from my generator may not bother other campers.
- I understand that I must be present on my site while the generator is running.
- I understand that if the noise from my generator bothers others, this permit will be revoked
- I understand fuel powered generator exhaust must be directed away from human occupancy and entrances/windows of any camping unit.
- I will use appropriately sized electrical cords in good condition to not overload the equipment.
- I will keep a minimum distance of ten feet between camping units and extensions to protect from carbon monoxide poisoning.
- I am aware that in Administrative Code 45 I may be fined under NR 45.04(3)(e) if I do not follow the conditions of this permit.

(e) *Noise.* No person may operate any sound truck, loudspeaker, generator, chainsaw, air-conditioner or other device that produces excessive, loud or unusual noises without first obtaining a written permit from the department.
