Great Lakes Emergency Erosion Control Self Certification

Form 3500-127 (R 05/20)

Notice: Pursuant to s. 30.12, Wis. Stats, permitting is required to place materials below the ordinary high water mark along the Great Lakes unless the activity is exempt. This form should be completed and submitted to the Department to self certify emergency erosion control projects along the Great Lakes. Personally identifiable information collected will be used for administrative purposes and may be provided to requestors to the extent required by Wisconsin's Public Records law [ss. 19.31-19.39, Wis. Stats.]

Project Design

- By checking this box, I certify that the temporary emergency control measure will comply with the following standards:
- This project is located on the Great Lakes or Bay of Green Bay
 - This project is intended to address an emergency shoreline erosion concern.
 - Erosion control material will be placed along the natural contour of the shoreline at the ordinary high water mark (OHWM). See the [OHWM fact sheet](#) for more information about this location.
 - Filter fabric will be placed along the natural bank prior to the placement of erosion control material.
 - Rock, stone, or heavy clean concrete erosion control material will be large, non-flat, angular, interlocking pieces and sufficient weight to remain in place. Note: Clean concrete contains no re-bar, metal, or paint, and is free of fine sediments
 - Erosion control material will be placed at the toe of the slope if along a bluff and no material will be placed on the bluff face.
 - Erosion control material will be placed at a 2 foot horizontal to 1 foot vertical slope and will not be placed higher than the existing bank
- I acknowledge that the operation of equipment on the lake bed is prohibited with limited exemptions under [s. 30.29, Wis. Stats.](#), and agree to contact the [local water management specialist](#) to discuss my project with them prior to beginning construction if site access challenges require alternative installation methods.
- By checking this box, I certify that I understand a permit is needed for this activity and should be applied for within 18 months of completing this activity.

Permitting Information

Please note that your project may require authorization from local shoreland zoning or floodplain regulatory authorities. It is your responsibility to contact those entities to ensure your project complies with all local regulatory requirements. Once you submit this signed form to the Department of Natural Resources, no immediate further action is required of you by the department. This form should be submitted to DNREmergencyShoreProtection@Wisconsin.gov.

Once your emergency situation has been addressed, please visit <https://dnr.wi.gov/permits/water/> to begin the permitting process for this project.

Certification

Based on the information provided, I believe that the temporary erosion control measure complies with the listed professional standards and understand that permitting is needed for this activity. I certify that the information provided is true, accurate, and complete.

NOTE: If submitting this request electronically, please type your name on the signature line, Your typed name, along with the email message generated from electronic submittal of this form, will be used as an electronic signature which is the legal equivalent to an actual signature.
