

What are PFAS?

PFAS are a group of human-made chemicals used for decades in numerous products.

stain-resistant carpet & fabric

non-stick cookware

firefighting foam

fast food packaging

Products that **may contain PFAS.**

What is Wisconsin Doing About It?

establishing PFAS health standards for drinking water, groundwater and surface water

soil & water testing

researching fish & wildlife

listening & feedback sessions

state collaboration

Additional efforts include a **PFAS Action Committee** (WisPAC) and a **PFAS Technical Advisory Group**.

Why Should I Care?

PFAS persist in the environment and the human body for long periods of time. Recent findings indicate that exposure to certain PFAS may have harmful health effects in people.

certain types of cancers

thyroid & heart issues

infertility & low birth weight

developmental delays

What You Can Do...

Test Your Water
