Should you let your kids or pets play in this?

BAD IDEA!

Algae are common in lakes and rivers. But at high concentrations a type called “blue-green” algae can make people and animals sick.

What to look for:
- Does the water look “pea soupy”?
- Does it smell swampy?

Blue-green algae can:
- Irritate skin, eyes and nasal passages and make you sick.
- Poison your pets or livestock – animals have died from it.

If you or your pets have come in contact with blue-green algae, wash thoroughly.
Think you or animals are sick from it?
Call a doctor or veterinarian immediately.

When in doubt, best keep out!
