A NOTE FROM THE OPERATOR CERTIFICATION PROGRAM COORDINATOR

It has been a little over two and a half years since I have taken on the position of operator certification coordinator, and it continues to be a pleasure working with operators and trainers. I have met many of you at events and have spoken to even more of you on the phone. I appreciate all the work you do to protect the waters in our state and ensure that citizens have safe drinking water. I am impressed by your dedication and commitment to your work.

The weather this past year has been challenging to say the least, with the long bitterly cold winter and the strong storms in the summer. Continuing education credits for your certification renewal was probably one of the last things on your mind during those difficult months. However, I hope you have had a chance to view and use some of our new online tools that were built to make the renewal process easier for operators. Our new training calendar was launched in August 2013 with the hope that it will be easier for operators to find approved training in their part of the state. In June 2013, we introduced the Operator Certification Lookup Webpage. Operators can track their certification expiration date, print a wallet card, and view their training history on this handy site. Lastly, as of January 1, 2014, operators no longer have to obtain a paper credit slip at training events and keep them for up to 3 years. Instead, training providers submit attendance rosters directly to the DNR, and operators can view their training history online to track their credits. For more details on all of these enhancements, please see the articles inside this newsletter or view our website.

A big change coming in the next year for wastewater operators is the revised Wisconsin Administrative Code NR114. In 2010, Jack Saltes, a longtime DNR wastewater operations engineer, gathered a workgroup consisting of operators, training providers, and WWOA and WRWA representatives with the goal of improving our wastewater operator certification program. Over the past several years, they have been working on revising the administrative rule to take into account new treatment technologies and to allow operators more flexibility in obtaining advanced level certification. They have also incorporated the new wastewater operator apprenticeship program into these rules, as a way to obtain advanced certification points.

Continued on page 2
ATTENTION WASTEWATER OPERATORS: NR 114
GRANDFATHERING INFORMATION

The revised Administrative Rule NR114 was published on July 1, 2014. These revisions take effect on July 1, 2015, a year from the publish date. All certified wastewater operators will be grandfathered into the new system based on their grade level and subclasses at the time the revised code takes effect on July 1, 2015. New certificates reflecting the new subclasses and grade levels will be mailed to all operators at that time. Operators may review the grandfathering information below to see how their certification will transfer to the new system.

How operator grade levels will be converted:

Grade T subclasses will convert to Operator-in-Training. One year of subclass-specific experience will still be required to move above Operator-in-Training.

Grade 1 and Grade 2 subclasses will convert to the Basic Level, except if one or more other subclasses are at Grade 3 or Grade 4.

Grade 3 and Grade 4 subclasses: If an operator has Grade 3 or Grade 4 in any subclass, except Special K and Electroplating/Metal Finishing, all subclasses Grade 1 and higher will convert to the Advanced Level. The operator will receive their “10 points” towards Advanced Certification.

If the operator has passed advanced level exams and has enough experience to be at Grade 3 or Grade 4, but has not submitted an experience form, they must submit that form before July 1, 2015 to ensure transfer to the Advanced level. If an operator’s certification does not convert to the advanced level, they can apply for advanced certification at a later date using the new advanced point system.

More information about the revisions is available on the Operator Certification Website at:
http://dnr.wi.gov/regulations/opcert/news.html

The experience form is also available on the Operator Certification Website:
http://dnr.wi.gov/regulations/opcert/forms.html

*ADVANCED CERTIFICATION*

A Quote From Jack Saltes, DNR Wastewater Engineer:

* A total of 10 points will be required to obtain advanced certification, with a minimum 4 out of 10 points obtained through work experience.
Veterans Fee Waiver Program

Veterans may apply for a one-time fee waiver to be used towards exam fees. Visit the DNR Operator Certification Forms & Applications Web Page for more information.

SPOTLIGHT ON NEW STAFF

**Hi, I'm Steve Geis.** I joined the DNR as the Section Chief for Laboratory Certification, Operator Certification, and Laboratory Services in December of 2013. Prior to that, I was a Chemist Supervisor at the State Lab of Hygiene. I was the first employee of the new Environmental Toxicology Lab (Whole Effluent Toxicity Testing) 26 years ago, and for the past 10 years served as the Supervisor of both that lab and the Organic Chemistry section. I have a Master’s degree in Water Chemistry from UW-Madison and my B.S. degree is in Water Chemistry from UW-Stevens Point.

**Hello my name is Sharon Helt** and I just became the Regional Coordinator for Waterworks Operator Certification in South Central Region in June of this year. I have worked for the Department of Natural Resources for 37 years. I have worked in the Drinking & Groundwater program for the past 22 years as an Environmental Program Associate. I work closely with Public Water Supply Engineers and Specialists implementing the Safe Drinking Water Act (SDWA) regulations. I am usually the first point of contact when systems have unsafe bacteria samples and guide them in helping the system return to having safe water. I am looking forward to my new role. So if you have any questions, please give me a call.

**Hi, I'm Danielle Luke,** the new Wastewater Support Specialist. I primarily work on implementing the NR 114 wastewater treatment plant operator rule revisions. I also provide support for CMOM guidance and training as well as Compliance Maintenance Annual Reports (CMARs). I am a grade 4 certified wastewater operator in eight subclasses with an Associate Degree in Environmental Science-Natural Resources from Fox Valley Technical College. After graduating from Fox Valley Tech in 2009, I worked as a wastewater operator at both industrial and municipal wastewater treatment facilities. In addition to my position with the DNR, I am returning to college for a Bachelor’s Degree in Waste Management from UW-Steven’s Point.

**Hello everyone, my name is Amy Dubruiel.** I am a Program Assistant with the Operator Certification Program. I am stationed in Madison, and from there I work on operator renewals, training attendance forms, and exam applications, among other duties. I have greatly enjoyed interacting with operators and learning about the technical knowledge associated with being a wastewater, municipal waterworks, and small water system operator.

**Employment or Address Changes Reminder:** If you change employment, ask your facility to notify your DNR representative of any personnel changes. Contact your regional coordinator (page 4) if you have a change in mailing or email address. Current contact information helps get important updates and reminders to you in a timely manner.
ARE YOU TAKING ADVANTAGE OF THE NEW ONLINE FEATURES?

Over the past year, the Operator Certification Program has been busy making enhancements to increase efficiency and improve customer service to operators and training providers. Please visit our website to use our new Operator Certification Look-up website and our new Training Calendar.

Our website is:  
http://dnr.wi.gov/regulations/opcert  

-OR-  

You may start at the DNR homepage http://dnr.wi.gov and search keywords “Operator Certification”

Our new and improved training calendar makes it easier for operators to find relevant training in their part of the state. Any training that is pre-approved by the Operator Certification Program will be listed on this calendar. An operator can filter by certification type, training sponsor, county, or search within a specific date range. The map of Wisconsin on the right shows where training is located around the state. If an operator clicks on the pin, all training in that selected county will be displayed.

For an up-to-date calendar of training events, please visit our online training calendar:  
http://dnr.wi.gov/regulations/opcert/training.html
ELECTRONIC TRACKING OF CREDITS

The Operator Certification Program has been receiving good feedback on our new electronic tracking of credits that began January 1st of this year! Many operators have already renewed their certification with the new system.

Here is how the new system works for those who have not yet renewed with the new system: Six weeks before an operator’s certification expiration date, operators will receive a renewal reminder letter via postal mail, same as usual. At that time, the operator may mail in any paper credit slips from training prior to January 1, 2014. If the operator has taken any training after January 1, 2014, then they should print their training history report (available on the Operator Certification Lookup Webpage), sign the report to certify their attendance, and mail that in with the renewal. The $45 renewal fee can be paid by check or money order.

The Operator Certification Program anticipates a future phase of this project that will be a complete online renewal system. Operators will be able to certify their attendance electronically with an e-signature and pay with either a credit card or e-check. This future phase will be several years out, once operators have used all remaining credits slips from training conducted prior to January 1st, 2014.

HOW-TO REPORT HEALTH AND SAFETY CREDITS

Per WI Administrative Code NR 114, a max. of 6 hours of health and safety related training may be used per renewal period. Examples of health and safety related training include First Aid, CPR training, Confined Space Entry, Excavation Safety, blood borne pathogens, and hazardous plant chemicals.

To receive credit for health and safety training that isn’t reported directly to the DNR by the training provider, the Operator Training Report Form, available on the Operator Certification Forms webpage, must be completed. More than one operator can be listed on the form, if they all took the same training course.

All training report forms must be accompanied by a proof of attendance. Examples of proof of attendance include: a certificate of completion, a copy of a First aid/ CPR card, or a copy of the sign-in sheet.

DNR OFFERS LAB EXAM REVIEW COURSES

These courses are designed to help operators prepare for the Lab Intro and Lab Advanced exams. Course content is based on the DNR study guides, with input from the experienced instructors. Operators will be granted 6 wastewater operator credits for each completed course. Morning refreshments will be provided; operators must find lunch on their own.

Intro Level Exam Review: Thursday, October 23rd, 2014
8:30 am – 3:30 pm

Advanced Level Exam Review: Friday, October 24th, 2014
8:30 am – 3:30 pm

Location: American Family Training Center, Near Interstate 90/94/39, Madison, WI

Cost: $25 for each day

Questions: Contact Lisa Bushby at 608-266-0498

Deadline to apply is October 15th.

Operators will receive an email confirming their registration, as well as directions to the location of the training. Please make check or money order payable to the DNR ($25 for each day). Submit payment along with this registration form to:

DNR
Operator Certification Program SS/7
PO Box 7921
Madison, WI  53707-7921

Registration Information:

Name: ______________________________________________________

Wastewater Operator Certification Number (if a certified operator): __________

Phone number: ____________________

Email address: _________________________________________________

I am registering for:   _____ Lab Intro Exam Review: Thursday, October 23rd
                      _____ Lab Advanced Exam Review: Friday, October 24th
Wednesday, November 5th - Deadline to apply October 8, 2014

Wednesday, May 6th - Deadline to apply April 8, 2015

Exam applications are mailed to operators who have taken an exam in the last year and a half. Exam applications are available on our website.

CONGRATULATIONS
At the May 7th, 2014 exams, 88 new municipal waterworks and 93 new wastewater operators became certified. Congratulations to all the new certified operators and to operators that added a new subclass to their certification!
