

Contract Certified Operator Services for Public Water Systems in Wisconsin

- The companies on this list provide contract certified operator services to public water systems in Wisconsin. Businesses on this list must comply with all the requirements in Wisconsin Administrative Code Chapter NR 114, "Certification Requirements for Waterworks, Wastewater Treatment Plant, Septage Servicing and Water System Operators." These listings are compiled from information provided by the businesses. Inclusion on this list does not constitute an endorsement of any companies, and the DNR does not hold any liability for the businesses listed.
- Water systems that do not have their own certified operators and that seek to contract for certified operator services may want to contact several companies and gather information about their services and fees.
- Water system owners should contact your facility's water supply specialist or engineer to designate a certified operator for the system or to inform DNR of personnel changes at your system.
- This list is updated regularly. To add, remove or correct listings, contact the Operator Certification Program, at 608-266-5227 or DNROpCert@Wisconsin.gov
