**Project Description Summary**

Marinette County proposes to complete a trail rehabilitation on the year round ATV/UTV Trail starting on the trail one (1) mile south of Homestead Lake Road where the trail leaves the powerline and travels northwest to Forest Road 1514. The trail is in an area has considerable elevation change which results in numerous curves to traverse those hills. There are a couple minor wetland pockets in the area however none are immediately adjacent to the trail. From the years of use, the trail has become washed out and lower than the surrounding terrain which causes the water to run down the trail causing additional washouts, exposing rocks and other hazards. The plan is to build up the trail bed using the adjacent on site soils. The goal is to slope the trail to disperse the water in a fashion which does not result in washouts. If it is determined that a more concentrated volume of water is going to occur some additional stone may be needed to control erosion. After the trail bed has been graded 6" gravel will be placed over the trail bed on major areas and 4" gravel on minor areas. These improvements should result in less trail maintenance for a safer and more enjoyable ride.

**Trail Project Detailed Description**

Marinette County proposes to complete a trail rehabilitation on the year round ATV/UTV Trail starting on the trail one (1) mile south of Homestead Lake Road where the trail leaves the powerline and travels northwest to Forest Road 1514. The trail is in an area has considerable elevation change which results in numerous curves to traverse those hills. There are a couple minor wetland pockets in the area however none are immediately adjacent to the trail. From the years of use, the trail has become washed out and lower than the surrounding terrain which causes the water to run down the trail causing additional washouts, exposing rocks and other hazards. The plan is to build up the trail bed using the adjacent on site soils. The goal is to slope the trail to disperse the water in a fashion which does not result in washouts. If it is determined that a more concentrated volume of water is going to occur some additional stone may be needed to control erosion. After the trail bed has been graded 6” gravel will be placed over the trail bed on major areas and 4” gravel on minor areas. These improvements should result in less trail maintenance for a safer and more enjoyable ride.

At the present time the plan is to obtain gravel for the project from a non-metallic mine located off County C just west of the Village of Wausaukee limits.

Trail is a Summer/Winter ATV/UTV and snowmobile trail.

Pictures will be taken and sent once snow melts.
