- Yes No Is a permit needed? (Please provide any written correspondence from WMS.)
- Yes No Have you contacted your County Zoning Dept. regarding a floodplain determination?
- Yes No Will an H & H (hydrologic and hydraulic) study be required?

Bridge Project Detailed Description

The Mill Pond Bridge is a 12' x 70' bridge fabricated from tubular steel that crosses the Mill Pond/Rathbone Creek located in the Town of Little Falls (unincorporated Cataract). The Cataract Trailbusters would like to repair some damage to the bridge and add additional supports for the decking. The decking would also be replaced with two bi-directional layers of decking. The current decking supports are 4' apart which is a large span to carry the weight of a wheeled grooming unit.

Current bridge load capacity is unknown. County is looking for an Engineer to ascertain load limit now, and what it would be should repairs be approved. They believe it was constructed by Anderson in '92 or '93 and have reached out to them as well for more information. County is also having difficulty getting responses when requesting quotes.

Kurt,

This is the email that held the attached quote for the Mill Pond Bridge (which is in Cataract). Fyi. I think that Anderson Bridges built this bridge in 1992 or 93 and I have contacted them to see if they might have an engineered drawing with a load rating on it.

DaAnna,

Could you resend the quote for the Cataract Bridge. It wasn't attached.

Hi Good Morning Chad,

I was wondering if you could tell me the estimate time of when we will be receiving the check from Norwalk Bridge?

I am doing some paperwork this morning and we owe few vendors and I am trying to figure out when would be the best to pay them.

Also Jeff wanted me to mention that he worked on the quote for the Cataract Rehab Bridge

below is an attached file for what he came up with.
