Project Description Summary

The Price County Snowmobile Trails Association is planning on constructing a snowmobile bridge across Hay Creek in the Town of Hackett, located in South-central Price County. There is an existing bridge with existing fill, so that will be utilized for the new bridge. The bridge is to only be used as a snowmobile bridge during the snowmobile season. The design will consist of a bridge with 20' in length and 12' wide with two 15'x12' ramps. Disturbance will be minimal since the bridge will be anchored by driven posts. Silt fencing will be placed along the river during construction to ensure no erosion occurs. The area impacted will be the 50' of which the bridge crosses the river. The area where the bridge is located is mapped wetland, so no fill will be placed on site.

** Based on quotes provided, the bridge will be a 60ft clear span, 12ft wide.

I certify that all maintenance land use agreements are on file.
