

Remediation and Redevelopment Program Issues & Trends 2017

October 4, 2017

12:00 p.m.

Dial: 1-855-947-8255

Passcode: 6612 745#

New RCL Alternative

Polycyclic Aromatic Hydrocarbon (PAH)
Cumulative Assessment for
Non-Industrial, Direct Contact Risk

Paul Grittner

Paul.Grittner@wisconsin.gov

David Swimm

David.Swimm@wisconsin.gov

Questions will be taken during the presentation.
You may also submit questions to DNRRRComments@wisconsin.gov

What is the modified RCL Spreadsheet:

- It's a method for completing a risk assessment (per NR 722.11(1)) to develop alternative soil standards to RCLs to evaluate direct contact risk posed by PAHs at non-industrial sites
- Will demonstrate that certain concentrations of PAHs will not pose a significant risk, even if individual compounds are present at concentrations greater than their RCL
- Should not be considered for samples where compounds other than PAHs exceed a direct contact RCL

Basis:

DHS Reassessment

- PAHs found as mixtures, not as independent compounds
- PAHs have similar human health and toxicology effects, so can be effectively evaluated together

Applicable PAHs - Seven Carcinogenic Compounds(cPAHs):

- Benzo[a]pyrene
- Benz[a]anthracene
- Benzo[b]fluoranthene
- Benzo[k]fluoranthene
- Chrysene
- Dibenz[a,h]anthracene
- Indeno[1,2,3-cd]pyrene.

The modified spreadsheet changes assessment for 7 cPAHs by:

from

Threshold RCL concentrations (mg/kg)
for individual compounds

to

Cumulative Threshold excess cancer risk value
($1/200,000$ or 5×10^{-6})
for summation of all 7 compounds

This is accomplished by:

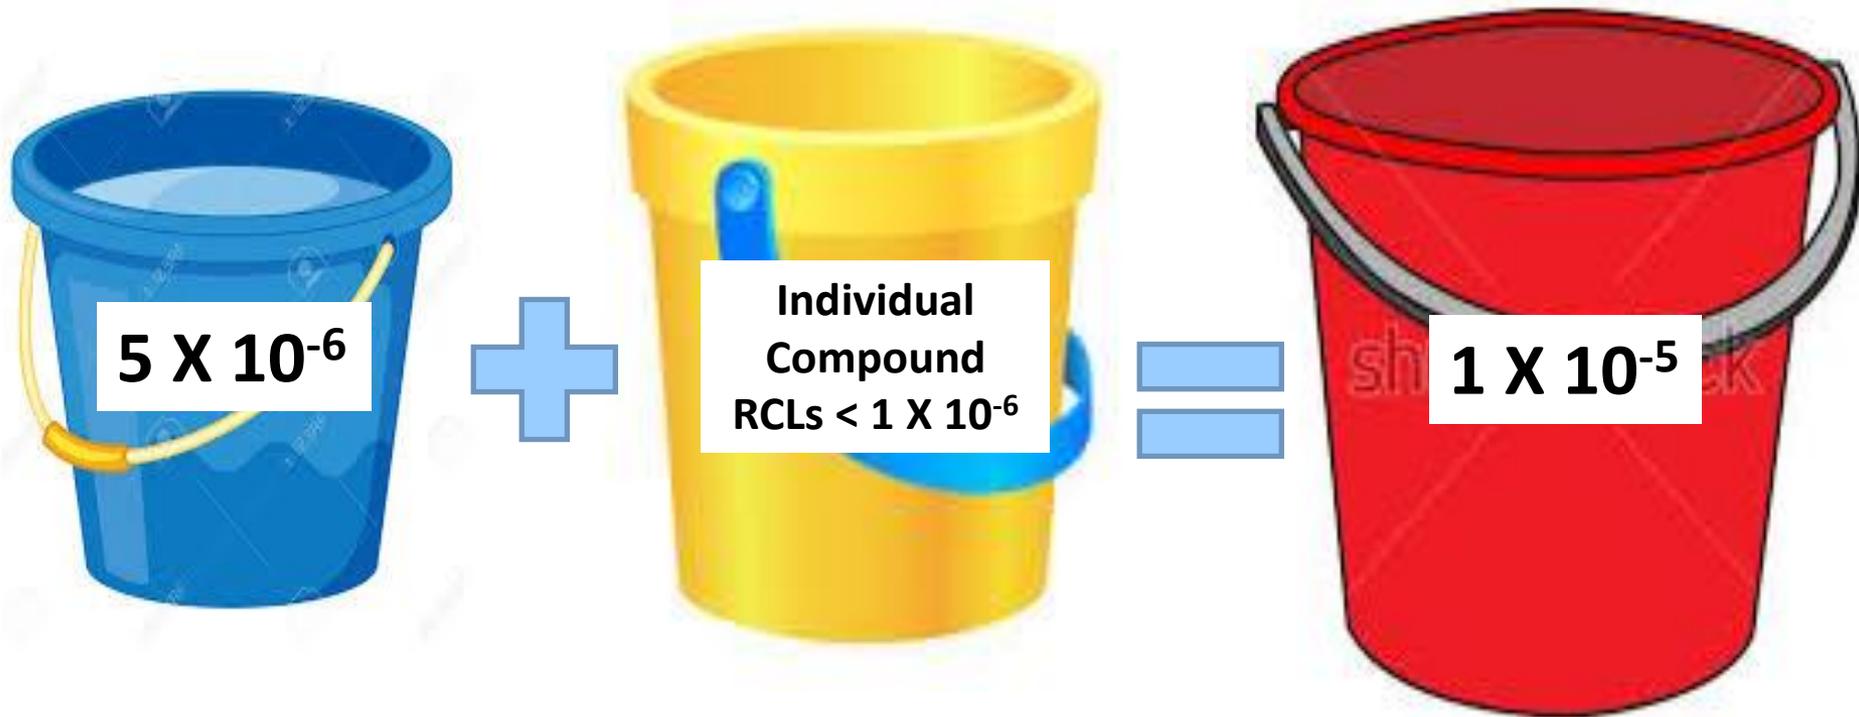

- 1) Not comparing concentrations of 7 cPAHs to a compound specific RCL in the calculator.
- 2) Adding a new column in the spreadsheet to tabulate total cancer risk posed by the 7 cPAHs.

(Contaminants not listed can be added starting at Row 912.)								cPAHs / Comparison / Hazard Index / Cumulative Cancer Risk			
Find ...	CAS Number	NC RCL (mg/kg)	C RCL (mg/kg)	Not-To-Exceed D-C RCL (mg/kg)	Basis	Background Threshold Value (mg/kg)	INPUT Site Data (mg/kg)	cPAH Risk Threshold 5.00E-06	Flag E = Individual Exceedance!	Hazard Quotient (HQ) from Data	Target CR used: 1.00E-06 Cancer Risk (CR) from Data
Trimethylbenzene, 1,2,4-	95-63-6	373.	-	219.	Csat						
Trimethylbenzene, 1,3,5-	108-67-8	339.	-	182.	Csat						
Dioxane, 1,4-	123-91-1	1,020.	5.72	5.72	ca						
Naphthalene	91-20-3	178.	5.52	5.52	ca						
Nonane, n-	111-84-2	13.4	-	6.86	Csat						
Benzo[a]pyrene	50-32-8	17.8	0.115	0.115	ca				cPAH		
Acenaphthene	83-32-9	3,590.	-	3,590.	nc						
Acenaphthylene	208-96-8	-	-	-							
Anthracene	120-12-7	17,900.	-	17,900.	nc						
Benz[a]anthracene	56-55-3	-	1.14	1.14	ca				cPAH		
Benzo(j)fluoranthene	205-82-3	-	0.424	0.424	ca						
Benzo[b]fluoranthene	205-99-2	-	1.15	1.15	ca				cPAH		

Review:

1 cPAH at respective RCL (mg/kg)	↔	1 X 10⁻⁶ ECR
5 cPAHs at their respective RCLs	↔	5 X 10⁻⁶
1 cPAHs at 5X RCL concentration	↔	5 X 10⁻⁶
Threshold for all carcinogenic compounds (VOCs, PAHs, etc.)	↔	1 X 10⁻⁵
NEW – Threshold for 7 cPAHs	↔	5 X 10⁻⁶

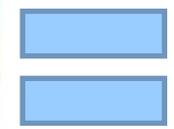

Risk Thresholds (excess cancer risk):

5×10^{-6}

Individual
Compound
RCLs 1×10^{-6}

1×10^{-5}

7 cPAHs

Other Carcinogens:

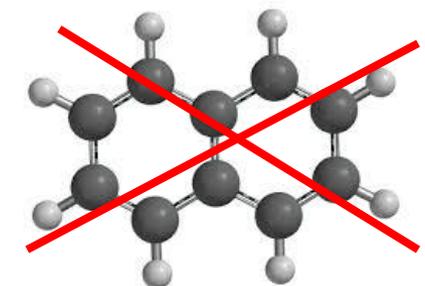

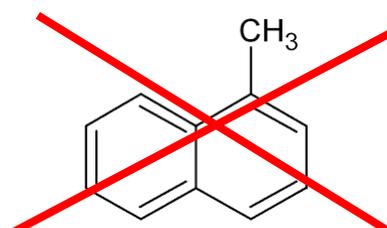

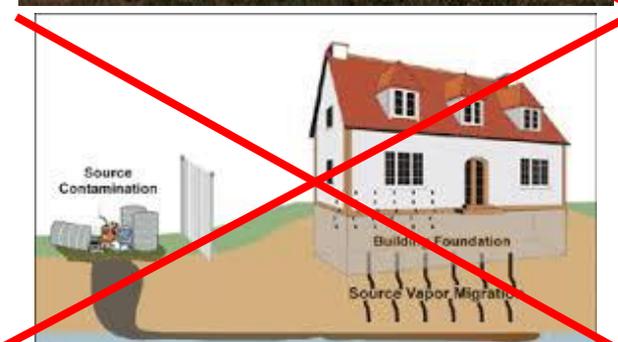

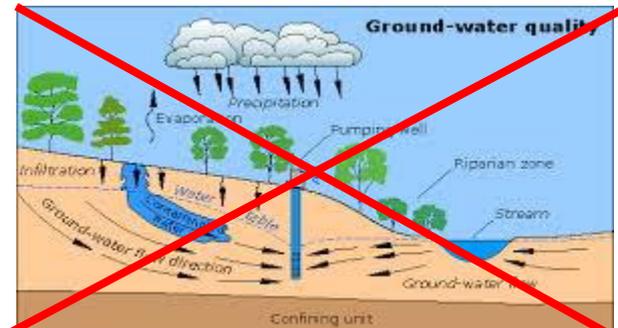

- Other cPAHs
- Metals, VOCs, others

**Total
Carcinogens**

The modified RCL spreadsheet only calculates alternative soil standards to non-industrial direct contact RCLs

The modified spreadsheet does not change the way:

- 1) Groundwater RCLs are assessed
- 2) Industrial direct contact RCLs are assessed
- 3) Vapor and other pathways require consideration
- 4) Naphthalene or 1-methylnaphthalene are assessed

Using the modified RCL spreadsheet requires pre-approval from the DNR

RP must request approval to prepare a risk assessment to determine alternative soil standards per NR 722.11.

- The modified RCL spreadsheet is a means to conduct the assessment.
- The modified spreadsheet provides standard exposure assumptions.

DNR will approve, modify, or deny the request.

Using the modified RCL spreadsheet

- 1) Open the spreadsheet – found on DNR’s website (search for Soil RCLs)

Resources for environmental professionals

The resources on this page are intended for environmental professionals who work with DNR’s Remediation & Redevelopment (RR) Program. For a more general description of the cleanup process, please visit [Cleanup overview](#). Download [NR 700 Process and Timeline \(RR-967\) \[PDF\]](#) for a visual summary of steps to receive final case closure per NR 700 rules.

Please [contact RR Staff](#) for situations not addressed by guidance and for site-specific technical questions.

[Forms and Guidance](#) | [Soil RCLs](#) | [Case closure](#) | [Technologies](#) | [MOUs](#) | [Contaminated sediments](#)

Soil residual contaminant levels

Guidance is available to help environmental professionals calculate residual contaminant levels (RCLs) in accordance with [NR 720, Wis. Adm. Code \[PDF exit DNR\]](#) (soil cleanup standards). The guidance consists of the following documents:

1. Instructions on using and interpreting results from the U.S. EPA’s Regional Screening Level (RSL) Web-Calculator and the RR Program’s spreadsheet of RCLs.
 - [March 2017 RCL Spreadsheet Update \(RR-052e\)\[PDF\]](#)
 - [Soil RCL Determinations Using the US EPA Regional Screening Level Web Calculator \(RR-890\) \[PDF\]](#)
2. Two versions of the RR Program’s spreadsheet of RCLs with soil levels protective of the direct contact pathway and groundwater quality.
 - [RCL spreadsheet for use with macro-enabled Excel program \[XLSM\]](#) (recommended) - Updated March 2017
 - [RCL spreadsheet \(no-macro\) for use with software other than Excel \[XLS\]](#) (file conversion may be needed before use)- Updated March 2017

Using the modified RCL spreadsheet

- 2) Enter the data, remembering to
- enter all compounds analyzed for in the sample
 - enter the detection limit if 'non-detected'
 - enter 'J' flag values
 - enter highest value for compounds analyzed more than once
 - enter all PAHs analyzed
 - Compounds not analyzed at a site aren't entered in the table
 - Groups of compounds not expected at a site aren't entered in the table

Typical Lab Report Results: (ug/kg)		Converted to mg/kg and changing NDs to MDLs:	
Acenaphthene	<18	Acenaphthene	0.018
Acenaphthylene	32 "J"	Acenaphthylene	0.032
Anthracene	45	Anthracene	0.045
Benzo(a)anthracene	46	Benzo(a)anthracene	0.046
Benzo(a)pyrene	53	Benzo(a)pyrene	0.053
Benzo(b)fluoranthene	51	Benzo(b)fluoranthene	0.051
Benzo(g,h,i)perylene	37	Benzo(g,h,i)perylene	0.037
Benzo(k)fluoranthene	57	Benzo(k)fluoranthene	0.057
Chrysene	62	Chrysene	0.062
Dibenzo(ah)anthracene	<18	Dibenzo(ah)anthracene	0.018
Fluoranthene	115	Fluoranthene	0.115
Fluorene	22 "J"	Fluorene	0.022
Indeno(123cd)pyrene	34	Indeno(123cd)pyrene	0.034
1-Methylnaphthalene	<18	1-Methylnaphthalene	0.018
2-Methylnaphthalene	22 "J"	2-Methylnaphthalene	0.022
Naphthalene	21 "J"	Naphthalene	0.021
Phenanthrene	44	Phenanthrene	0.044
Pyrene	93	Pyrene	0.093

Using the modified RCL spreadsheet

Methods to Enter Data:

- ❖ Type it in.
- ❖ Reorder the data in excel, copy and paste into RCL spreadsheet.

Typical Lab Report Results: (ug/kg)		Converted to mg/kg and changing NDs to MDLs:		Reordered analytes to match NR722 calculator (for ease of data entry):	
Acenaphthene	<18.8	Acenaphthene	0.0188	Naphthalene	0.0218
Acenaphthylene	52.2	Acenaphthylene	0.0522		
Anthracene	150	Anthracene	0.15	Benzo(a)pyrene	0.531
Benzo(a)anthracene	462	Benzo(a)anthracene	0.462	Acenaphthene	0.0188
Benzo(a)pyrene	531	Benzo(a)pyrene	0.531	Acenaphthylene	0.0522
Benzo(b)fluoranthene	509	Benzo(b)fluoranthene	0.509	Anthracene	0.15
Benzo(g,h,i)perylene	376	Benzo(g,h,i)perylene	0.376	Benzo(a)anthracene	0.462
Benzo(k)fluoranthene	573	Benzo(k)fluoranthene	0.573		
Chrysene	625	Chrysene	0.625	Benzo(b)fluoranthene	0.509
Dibenzo(ah)anthracene	125	Dibenzo(ah)anthracene	0.125	Benzo(g,h,i)perylene	0.376
Fluoanthene	1150	Fluoanthene	1.15	Benzo(k)fluoranthene	0.573
Fluorene	22.4	Fluorene	0.0224	Chrysene	0.625
Indeno(123cd)pyrene	341	Indeno(123cd)pyrene	0.341	Dibenzo(ah)anthracene	0.125
1-Methylnapthalene	<18.8	1-Methylnapthalene	0.0188		
2-Methylnapthalene	20.2	2-Methylnapthalene	0.0202		
Naphthalene	21.8	Naphthalene	0.0218	Fluoanthene	1.15
Phenanthrene	444	Phenanthrene	0.444	Fluorene	0.0224
Pyrene	926	Pyrene	0.926	Indeno(123cd)pyrene	0.341
				1-Methylnapthalene	0.0188
				2-Methylnapthalene	0.0202

- ❖ Others methods can be developed.

Using the modified RCL spreadsheet

Data is now entered

1. Enter data in yellow cells. Numeric-only values under "INPUT Site Data." For ND, use detection limit. Do not type '-', 'NA' nor 'space bar.' Leave purple cells "as is."											
2. After completing data entry, click "Get Summary" in Row 9 Click to go there.											
(Contaminants not listed can be added starting at Row 912.)											
Click to Clear INPUT Site Data Entries (Column H)											
cPAHs / Comparison / Hazard Index / Cumulative Cancer Risk											
cPAH Risk Threshold: 5.00E-06											
Target CR used: 1.00E-06

Phenanthrene	0.270	0.270	NS	NS
Pyrene	0.280	0.280	1,790	NS

Assessing Large Data Sets (only PAH contamination)

Step 1:

Assessing Large Data Sets (only PAH contamination)

Step 2:

Using the modified RCL spreadsheet requires pre-approval from the DNR

Request approval in writing through a technical assistance request or incorporate the request into any other **fee**-based submittal*.

Request must demonstrate that PAH concentrations exceed direct contact RCLs, and that obtaining compliance with them is not 'practicable.'

The following items should be provided to support the request to conduct a risk assessment:

- ❖ Tabulated data compared to individual compound specific RCLs
- ❖ Statement confirming that meeting these RCLs is not practicable

* Requests for approval for PECFA, VPLE, and DOT projects are managed similarly to other review requests within these programs

Using the modified RCL spreadsheet requires pre-approval from the DNR

After the DNR grants approval, the RP may use the modified calculator to assess non-industrial direct contact risk. Provide the following items to demonstrate the use of the modified calculator as part of a site investigation report, a remedial action completion report, or other submittal provided to the DNR.

- ❖ Tabulated data compared to cumulative PAH threshold risk value
- ❖ Copies of modified RCL spreadsheet summaries
- ❖ Any charts and tables used to define a 'breakpoint' for large data sets

DNR will not accept results of the risk assessment if the spreadsheet has unauthorized modifications or if all applicable sample data was not entered.

Using the modified RCL spreadsheet requires pre-approval from the DNR

DNR will review request and approve, modify, or disapprove

- ❖ Approval is expected to be the typical response – risk assessment based on chemical properties, not site conditions.
- ❖ Meeting non-industrial RCLs for PAHs listed in the unmodified spreadsheet is generally considered to be impracticable.

Questions

- ❖ DNR Guidance Documents are available:
 - ❖ RR-079, “Risk Assessment Approach for Calculating cPAH Non-Industrial Direct Contact RCLs - Wis. Admin. § NR 722.11 (1)”
