

PW-15 Inventory

Criteria for Potential Sources Within a One-Mile Radius of the Public Well Location

Group	Description
A	<p>Use of Class B fire-fighting foams and areas where training or use of foam are documented.</p> <p>Industries with a documented release to the environment that include: Textiles & leather; paper products; metal plating and finishing; wire manufacturing, industrial surfactants and makers of resins, molds or plastics; photolithography, semiconductor manufacturing.</p> <p>Waste disposal industries, wastewater treatment plants, biosolid spreading locations, manufacturers (listed above) with wastewater pre-treatment systems as part of their operations, or waste treaters with disposal to the sanitary sewer.</p> <p>Dry cleaning and laundry facilities (All these facilities are ranked A, though some locations may have only been drop off points).</p>
B	<p>Industries without a documented release to the environment that include: Textiles & leather; paper products; metal plating and finishing; wire manufacturing, industrial surfactants and makers of resins, molds or plastics; photolithography, semiconductor manufacturing.</p> <p>Manufacturers of commercial and consumer products including: paper and packaging; clothing and carpets; outdoor textiles and sporting equipment; ski and snowboard waxes; non-stick cookware; cleaning agents and fabric softeners; polishes and waxes; latex paints; pesticides and herbicides; hydraulic fluids; windshield wipers; paints varnishes, dyes and inks, adhesives; medical products; and personal care products (for example, shampoo, hair conditioners, sunscreen, cosmetics, toothpaste, dental floss).</p>
C	<p>Manufacturers/producers of food for human consumption.</p> <p>Other non-residential uses not included in the categories listed in A or B including commercial/retail businesses not specifically associated with one of the industries listed in B.</p>

Risk Criteria for Group "A" Sites

High	Use of Class B fire-fighting foams (fire training areas), multiple reported spills of varied substances, documented soil and/or groundwater contamination, waste disposal sites and/or business has operated for decades starting mid 20 th century
Medium	Reported spills of petroleum products, likely dischargers to sanitary sewer and/or business has been open for a decade or more.
Low	No reported spills or spills of small quantities immediately cleaned up and/or business opened recently.

Footnotes

Residential City Directory results were not included in the final database if they had no record of release or the release was petroleum related.

Database reviewed by GeoSearch as listed in the radius report.

Two identified Truax Field sites were outside the mile radius but were included for context.

Retail is defined as the general sales of goods and/or services to the public.

Commercial is defined as office locations and service industries. Some light industrial businesses located in office-type buildings or strip center locations maybe included in this classification on the spreadsheets.
