ISSUE TITLE & DESCRIPTION: Metrics to Measure Act 70 Pilot Project Success

AUTHOR: DNR Staff

THIS ISSUE IS (choose one):     Decision     Discussion     Information

---

EXPECTED OUTCOME: Receive feedback on the draft metrics and finalize if possible. Suggested metrics are welcome. Department to work with Advisory Group to annually report out on the agreed-upon metrics.

### Draft Metrics:

1. Issuance of Green Tier ROP based on Subgroup's timeline.
2. ?? of participants completing the requirements of the pilot project within the 5-year time frame.
  - Question: Should we develop a goal based on the ROP/Green Tier analysis?
3. Increase the number of sites that are VPLE certified by 10% in next 5 years than in the previous 5 years.
  - 49 Certificates of Completion issued in the last 5 years (as of 04/25/18)
  - 55 sites entering VPLE program in last 5 years (as of 04/25/18)
4. Increase number of Tier 2 Green Tier participants utilizing the Green Tier ROP by ?? within 5 years. Utilize the existing Tier 2 baseline participants.
5. After 5 years of the pilot program, report on the increased value of properties participating in the program.
6. Outreach
  - Questions: Would the advisory group like a metric for outreach? e.g., articles published, meetings attended? Documentation of potential participants to understand the participation rate? e.g., if we receive 10 inquiries about the program and 7 decide to participate, trying to understand why the other 3 decided not to participate so we can tweak the program, if necessary.
