Weston Wegener  
Environmental Business Support Coordinator  
Wisconsin Department of Natural Resources  
Sustainability and Business Support | Green Tier

Dear Mr. Wegener,

Inpro Corporation has been a Green Tier 1 participant since October 2014. At this time, Inpro would like to apply to become a Green Tier 2 participant.

Inpro's facilities in Muskego, WI are ISO 14001:2015 certified with an active environmental management system (EMS) team. The EMS team is comprised of plant managers, facility and maintenance managers, sustainability specialist, quality/environmental systems specialist, and senior managers. This team is responsible for committing to and communicating the message of our environmental policy; creating annual targets and implementing actions to achieve; and ensuring continual improvement in our environmental performance. Annual targets are created based on our environmental policy, significant environmental aspects, regulatory requirements, employee input, and market/industry developments. Targets established for 2020 include: investigating waste streams and determine a Net Zero waste goal; reduce electric usage by 5% (based on kWh/\$ shipped); reduce hydrographics department water usage by 8%; and investigate water reduction strategies for the irrigation system and restrooms. Some notable accomplishments between 2012 and 2018 include an 18% reduction of electric usage (based on kWh/\$ shipped) and a 49% reduction in paper usage volume.

The attached document lists Inpro's relevant interested parties not only from an environmental perspective but the company as a whole. To control/monitor these parties, actions are taken, as described in the attachment, and reviewed regularly by the EMS and senior management teams.

At this time, Inpro does not have any specific provisions to propose as part of our participation contract. Obtaining Green Tier 2 status provides Inpro with the pursuit of continual improvement of our environmental performance and continues to strengthen our relationship with the Wisconsin Department of Natural Resources.

Sincerely,

Jessica J Haasser  
Quality & Environmental Systems Specialist
