

Annual Perc Usage Report for Wisconsin Dry Cleaners

NR 438.03, Wis. Adm. Code, requires Wisconsin dry cleaners that use more than 23 gallons of perchloroethylene (perc) per year—estimated to be about 151 pounds emitted—to report their emissions of air pollutants. Emissions reports must be submitted by March 1st of each year for the amounts of air pollutants emitted during the previous calendar year.

Please fill in the information below regarding the use of perc during the previous calendar year for each of the locations where a perc dry cleaning machine is operated.

Company Name: _____

Owner's name: _____

Telephone: _____

Email: _____

For each location with a perc dry cleaning machine operated by the business, please fill in the following:

Gallons of perc used in previous year	Street Address	City	ZIP

If you have any questions, contact the DNR at 608-266-7718 and ask for the Emissions Inventory Coordinator.

Mail this completed report to:
