Species volumes, harvest guidelines, and locations of the sale areas are shown on the timber harvest prospectus and maps.

Please pay special attention to the attached sheet in your timber sale packet labeled “2017 SALE CONDITIONS – ALL SALES”. These are sale conditions that apply to all sales being advertised this bid opening; examples being bid instructions, performance bonds, pre-sale meetings, insurance/workers comp requirements, water quality BMPs, and forest certification.

In order to place a bid for any of these sales you must use the Timber Sale Bid forms (Form 2400-049A) that are enclosed. Acceptable bids will meet or exceed the Total Advertised Value, but individual specie/unit bids may vary providing they meet or exceed $1.00 per unit and each specie/unit must receive a bid. Be sure to sign and supply your name and address on each bid you submit.

Bid Bonds are not required. Winning bidders will have 6 weeks from date of bid opening to submit an acceptable performance bond to the department equal to 15% of the total winning bid amount. If the winning bidder fails to execute the contract and submit an acceptable performance bond, the bidder shall be required to forfeit to the department an amount equal to 10% of the total bid amount. Failure to submit the 10% penalty will result in the bidder being considered ineligible to bid on state timber sales for a two year period.

As noted above, bids will be accepted by postal mail or in person by the DNR Forester until 1:00 pm on Thursday, June 30th, 2016. Bids will be opened immediately thereafter in the Conference Room at the main entrance of the Plymouth Service Center, 1155 Pilgrim Road, Plymouth, WI 53073.

We look forward to the bid opening and working with you in the near future. Please feel free to contact me with any questions.

Sincerely,

Adam Zirbel
Forester - Northern Unit of the Kettle Moraine State Forest

TIMBER SALE PROSPECTUS
KETTLE MORAINE STATE FOREST – NORTHERN UNIT
2017 SALE CONDITIONS – ALL SALES

The following sale specifications apply to all sales offered in the 2017 Northern Unit Kettle Moraine State Forest Bid Opening on June 14th, 2017.

**Bidding Instructions**
1) Bid bond not required. Winning bidders will have 6 weeks from the date of the bid opening to submit an acceptable performance bond equal to 15% of the total sale bid value to the Department.
2) There is a total minimum sale value; any bids that do not meet the total minimum sale value will be rejected.
3) If the winning bidder fails to execute the contract and submit an acceptable performance bond, the bidder shall be required to forfeit to the department an amount equal to 10% of the total bid amount. Failure to forfeit the 10% penalty will result in the bidder being considered ineligible to bid on any state timber sales for a two-year period.

**Utilization Requirements**
1) Trees and top-wood are required to be utilized to a 4-inch diameter top unless otherwise agreed upon between Seller and Purchaser.
2) Cordwood: 100” stick to a 4” diameter top.
3) Sawlogs: 8’ log to a 10” diameter-inside-bark (dib) top.

**Contractor and Equipment Operator Requirements**
1) Pre-sale walkthrough on all blocks required before starting logging activities.
2) Prior to commencement of any work under this Contract and during the period of the Contract, the Purchaser shall provide proof of insurance coverage for all forest workers required by this Contract on an original Certificate of Insurance, counter-signed by an insurer licensed to do business in Wisconsin naming the Seller as a Certificate Holder.
3) Personal vehicles are not allowed on trails, unless otherwise agreed upon by the Forester and Purchaser.
4) The Department reserves the right to deny subcontractors used in the performance of this contract based on past performance on county, state, or federal timber sales, civil or criminal timber theft citations, or when doing so would be in the best interest of the citizens of Wisconsin as determined by the Seller.

**Contract Period**
1) There are contract periods of two (2) years and three (3) years.
2) Contracts will be signed within 6 weeks of bid opening.
3) Contract extensions will not be granted without reasonable justification.

**Special Conditions: Trails**
1) The Purchaser should be aware of the recreational trail uses in the sale area, including hiking, equestrian, snowmobile, and cross country skiing.
2) Signage will be provided by the Purchaser and established at edges of sale area on trails indicating; *Timber Sale Area Ahead* (minimum two inch lettering).
3) Trails can be used and crossed at limited locations. Any debris entering trail area within 15 feet of trail surface shall be removed immediately.
4) Care will be given to preserve the condition of the trails and all slash must be removed daily from trail surfaces. All slash shall be pulled back a minimum of 15 feet from trail edge prior to completing individual stands.
5) All ruts created on recreational trail surfaces shall be repaired daily to the satisfaction of the Seller.

**Special Conditions: Invasive Plants**
1) Off-road logging equipment shall be free of concentrations of plant material and soil prior to entering the sale area. The Purchaser will contact the Seller 48 hours prior to delivering equipment to the sale area to arrange for on-site inspection.
**TIMBER SALE PROSPECTUS**

**KETTLE MORaine STATE FOREST – NORTHERN UNIT**

**2017 SALE CONDITIONS – ALL SALES**

**Special Conditions: General**

1) The locations, building, and maintenance of landings, roads, and accesses are the full responsibility of the purchaser and are always subject to advance approval and under the conditions of the seller. The Forester must be contacted at least 48 hours prior to construction of a landing, road, or access.

2) Roads and landings shall be graded and leveled or closed out to the satisfaction of the Seller upon completion of timber sales. Any accesses developed across ditches will be restored to their original condition.

3) Trees not designated for harvest shall not be cut without specific authorization from the Department. If a non-designated tree is authorized to be cut, and is greater than 5” in diameter (DBH), it shall be identified, separated at the landings, and not removed from the sale area until scaled and paid for. Any trees cut without prior approval will subject the Purchaser to penalties and fines.

4) No woodpiles may be left on the landing for more than 30 days without advance approval of the Seller.

5) All spring poles (saplings tipped over from the equipment) will be cut at the base.

6) When accessing town roads or highways from a landing, signage will be required to indicate trucks entering roadway.

7) Maximum stump height shall not exceed stump diameter.

8) Whole-tree skidding will not be permitted unless otherwise agreed upon by Forester and Purchaser.

9) All trees marked or designated to be cut must be felled unless otherwise agreed upon by the Forester and Purchaser.

10) No harvesting during gun deer opening weekend and a period between Thanksgiving and the close of gun deer season.

11) All ironwood 5 inches in diameter or greater can be cut and utilized.

12) Trees shall not be felled across cutting unit boundaries. Any slash that crosses the red or blue lines shall be pulled back into the sale area immediately.

13) Slash shall be lopped and/or scattered evenly across sale area and lie within three (3) feet of the ground.

14) Rutting will be monitored and if soil disturbances are considered to be excessive based on the chart below, operations may be suspended and the contractor will be required to repair or mitigate them.

<table>
<thead>
<tr>
<th>Infrastructure</th>
<th>Soil disturbances are excessive if:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Roads, Landings, Skid Trails, and General</td>
<td>A gully or rut is 6 inches deep or more and is resulting in channelized flow to a wetland, stream, or lake.</td>
</tr>
<tr>
<td>Harvest Area</td>
<td></td>
</tr>
<tr>
<td>Roads, Landings, and Primary Skid Trails</td>
<td>In a riparian management zone (RMZ) of wetland, a gully or rut is 6 inches deep or more and 150 feet long or more</td>
</tr>
<tr>
<td>Secondary Skid Trails and General Harvest</td>
<td>In an upland area (outside of RMZ), a gully or rut is 10 inches deep, 30 inches wide, and 60 feet long or more</td>
</tr>
<tr>
<td>Area</td>
<td></td>
</tr>
</tbody>
</table>

**Note:** The depth is to be measured from the original soil surface to the bottom of the depression. If individual hug depressions are visible, the depth would be measured to the lesser of the two depths (the "top" of the hug). The length is measured from the start of the "too deep" section to the end of the "too deep" section. Measurements are not cumulative.

**Special Conditions: Coarse Woody Debris**

1) Existing snags and downed coarse woody debris will not be utilized and care will be taken to avoid damage with logging equipment.

**Special Conditions: Training**

1) To promote maximum benefit to the environment, the health and welfare of our logging contractors, and to adhere to requirements of forest certification standards, effective January 1, 2006 the State of Wisconsin will require training of its logging contractors. Successful purchasers of Kettle Moraine State Forest stumpage will need to ensure that the actual logging contractor complies with the Wisconsin Sustainable Forestry Initiative (SFI) Training Standard as adopted by the Wisconsin SFI Implementation Committee (SIC). Criteria for the standard can be found at the website.
TIMBER SALE PROSPECTUS
KETTLE MORAINE STATE FOREST – NORTHERN UNIT
2017 SALE CONDITIONS – ALL SALES

www.fistausa.org/sf_standards or by contacting the Forest Industry Safety & Training Alliance (FISTA). FISTA can provide documentation to the contractor confirming completion of the training standard. This will be required prior to starting sale (contract signing).

Forest Certification:

This timber sale is certified to the standards of the Forest Stewardship Council (FSC) as responsibly managed (license code FSC-C006979) and to the standards of the Sustainable Forestry Initiative (SFI) program. Forest products from this sale including logs, pulpwood, or chips of all species may be claimed as “FSC-100%” under certificate SCS-FM/COC-00070N or “100% SFI certified” under certificate NSF-1Y941-SF7.

**Mixed Hardwood Pulp – 53% Ash, 15% Sugar Maple, 11% Hickory, 7% Cherry, 6% Red Maple, 5% Birch, 3% Elm.
***Estimated tons are to a 4-inch top diameter and include top-wood.

Sale Type & Payment Instructions
This is a scaled sale on both Sawlogs (MBF) and Pulp (Tons). Payment for all products removed from the site must be made within 30 days from the time of billing under the deferred payment option.

Sale Access and Landings
Potential sale access and landings are off County Rd. T, Spring Valley Dr., and Kettle Moraine Dr. Sites and designated skid trails have been identified, but will be agreed upon by the Forester and Logger. Accesses along County Highways may require county temporary culvert permits; which will be the responsibility of the Purchaser.

Purpose of Sale
The management objective for the Conifer Thinning areas is to maximize tree vigor and health by lowering the basal area stocking to B-level. This will be accomplished by a combination of row thinning and individual tree selection. The Hardwood Thinning areas were designated using single tree selection. The goal is to promote tree health and vigor by lowering stocking to B-level (90 B.A.). The Aspen Coppice areas will be clear cut to promote aspen regeneration. In the large coppice area oaks were reserved to promote diversity.
General Cutting Requirements
1) **Conifer Thin Areas**: Row thinning designated by two Orange dots; Individual trees marked with Orange slash; Ash will be designated in these areas.
2) **Hardwood Thin Areas**: Orange slash denotes cut trees.
3) **Aspen Coppice**: Cut all trees greater than 2 inches in diameter.
4) **Ash Clearcut**: Cut all Ash and Aspen within boundary. Reserve all other species.
5) Green Paint denotes reserve trees within coppice and clearcut boundaries.
6) Purple Paint denotes clearcut/coppice boundaries.
7) Red Paint denotes harvest area boundary.

Special Operating Requirements:
1) Harvesting and forwarding shall only occur between **August 15th** and **March 15th** to avoid impact to threatened / endangered species nesting periods.
2) Logging operations can only occur during dry or frozen soil conditions. Ash clearcut will require frozen conditions due to wet areas throughout stand boundary.
3) An approved stream crossing will be required for access to areas designated on map. DNR staff will procure required permits for temporary stream crossing installation.

Conversion Factors
1) The following weight conversion will be used in the conversion of weight scale to cords or cords to weight scale. Factors for mixed hardwood cordwood may be developed by weighted average of cruise estimates based on species volume distribution and or ocular estimates.

<table>
<thead>
<tr>
<th>Species</th>
<th>Weight (lbs)</th>
<th>Weight (Tons)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aspen</td>
<td>4500</td>
<td>2.25</td>
</tr>
<tr>
<td>Mixed Hardwood</td>
<td>4800</td>
<td>2.40</td>
</tr>
<tr>

<td>4000</td>
<td>2.00</td>
</tr>
<tr>
<td>Oak</td>
<td>5600</td>
<td>2.80</td>
</tr>
<tr>
<td>White Pine</td>
<td>4200</td>
<td>2.10</td>
</tr>
</tbody>
</table>

2) Conversion of MBF (thousand board feet) to cords or cords to MBF shall be 2.20 cords per MBF for hardwoods and 2.44 Cords per MBF for conifers. The Scribner Decimal C Log Rule shall be used for scaling logs.

Special Conditions: Forest Health
1) The sale area is located within Sheboygan County, which is in the emerald ash borer quarantine zone. The logger should be aware of and comply with relevant EAB quarantine regulations.
2) **Annosum Root Rot Treatment**: This sale requires the Purchaser to complete Annosum root rot preventative treatment between 4/1 – 11/30. Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either RotstopC or CELLU-TREAT (disodium octaborate tetrahydrate). Treatment should be made as soon as possible and no later than one day after harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions, but should be considered when submitting bids on these timber sales.

*Mixed Hardwood Pulp – 29% Red Maple, 23% Basswood, 22% Ash, 14% Cherry, 12% Elm

Sale Type & Payment Instructions.
This is a scaled sale on Pulpwood (Tons). Payment for all products removed from the site must be made within 30 days from the time of billing under the deferred payment option.

Sale Access and Landings
Sale access is off Hilltop Road. Access and landings have been identified, but will be agreed upon by the Forester and Logger.

Purpose of Sale
The management objective for the majority of the conifer stands (20 acres) is to reduce density through even aged thinning to control spacing and density, improve stand health / vigor, and release future crop trees. A 3-acre even aged coppice harvest is employed to regenerate early successional hardwood species. An additional 3-acre portion surrounding declining/diseased red pines was also designated to be even aged clearcut, with a goal of converting site to hardwoods relying on advanced hardwood regeneration and future planting.

General Cutting Requirements
1) **ROW THINNING UNITS (GREEN on MAP – 15 acres)** – Harvest all ROWS denoted with 2-ORANGE DOTS. Cutting boundaries are marked with RED paint.
2) **RED PINE INDIVIDUAL TREE THINNING UNIT (RED on MAP - 8 acres)** - Cut all trees marked with an ORANGE PAINT slash. Cutting boundaries are marked with RED paint.
3) **CLEARCUT UNITS (PURPLE on MAP - 6 acres)** – Harvest all trees greater than 2” within PURPLE PAINT boundaries. Reserve all GREEN PAINTED trees.

Special Operating Requirements.
1) Harvesting shall only occur between August 15th and March 15th of any calendar year.
2) Logging operations can only occur during dry or frozen soil conditions.
**Conversion Factors**

1) The following weight conversion will be used in the conversion of weight scale to cords or cords to weight scale. Factors for mixed hardwood cordwood may be developed by weighted average of cruise estimates based on species volume distribution and or ocular estimates.

2) Conversion of MBF (thousand board feet) to cords or cords to MBF shall be 2.20 cords per MBF for **hardwoods**. Conversion of MBF (thousand board feet) to cords or cords to MBF shall be 2.44 cords per MBF for **softwoods**. The Scribner Decimal C Log Rule shall be used for scaling logs.

**Special Conditions: Forest Health**

1) **Annosum Root Rot Treatment.** This sale requires the Purchaser to complete Annosum root rot preventative treatment between 4/1 – 11/30. Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either Sporax (sodium tetraborate decahydrate) or CELLU-TREAT (disodium octaborate tetrahydrate). Treatment should be made as soon as possible and no later than one day after harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions, but should be considered when submitting bids on these timber sales.

2) The sale area is located within Sheboygan County, which is in the emerald ash borer quarantine zone. Purchaser should be aware of and comply with relevant EAB quarantine regulations.

The award shall be based on this TOTAL BID AMOUNT:

Performance Bond
Will be in the form of: (select one)

☐ Cash
☐ Personal Check
☐ Certified Check/Money Order
☐ Irrevocable Letter of Credit

☐ Assurance Bond
☐ Certificate of Deposit
☐ Assignment of Savings Account

I understand that any or all bids may be rejected and that consideration and awarding of a contract will be based upon my past performance and ability to complete contracts. I also understand that if I am the winning bidder, I have 6 weeks from the date of the bid opening to submit an acceptable performance bond. I also understand that if I am awarded the contract and fail to execute it or work under it, I will be required to forfeit to the Department an amount equal to 10% of my total bid amount. Failure to forfeit the 10% penalty will result in being considered ineligible to bid on any state timber sales for a two-year duration. In the event the highest bidder can not or will not sign the contract, the award will be made to the next highest qualified bid.

Notice: I understand:

Utilization specifications and estimated volumes are listed in the prospectus which is available upon request from the Department.

A copy of the standard timber sale contract which must be entered into is available upon request from the Department.

*Mixed Hardwood MBF – 30% Birch, 24% Hickory, 18% Red Maple, 14% Cherry, 13% Elm, 1% Beech
**Mixed Hardwood Pulp – 44% Ash, 15% Sugar Maple, 12% Birch, 8% Elm, 7% Hickory, 6% Red Maple, 5% Cherry, 3% Basswood.
*Estimated tons are to a 4-inch top diameter and include top-wood.

Sale Type & Payment Instructions
This is a scaled sale on both Sawlogs (MBF) and Pulp (Tons). Payment for all products removed from the site must be made within 30 days from the time of billing under the deferred payment option.

Sale Access and Landings
Potential sale access and landing are off County Rd. F. Sites and designated skid trails have been identified, but will be agreed upon by the Forester and Logger. Accesses along County Highways may require county temporary culvert permits; which will be the responsibility of the Purchaser.

Purpose of Sale
The management objective for the majority of the harvest acreage is to maximize vigor and tree health by lowering basal area stocking using a single tree selection (97 acres). Ash was targeted for accelerated removal due to likely mortality by Emerald Ash Borer. Within aspen coppice areas (19 acres); management objective is to regenerate early successional species using even aged coppice regeneration harvests. Two small conifer plantations (6 acres) were also designated to be clearcut, with a goal of converting site to hardwoods relying on advanced hardwood regeneration and future planting.
General Cutting Requirements
1) Orange Paint denotes trees to be cut.
2) Red Paint denotes the harvest unit boundaries.
3) Blue Paint denotes private land boundaries.
4) Purple Paint denotes aspen coppice boundaries. Within Purple Paint cut all stems greater than 2 inch diameter. Reserve all green painted trees.
5) Yellow Paint denotes conifer clearcut boundaries. Within yellow paint boundary cut all conifers, ash, and aspen. Reserve all green painted conifers and all other hardwoods.
6) Green Paint denotes reserve trees within coppice and clearcut boundaries.
7) Maximum stump height shall not exceed stump diameter.

Special Operating Requirements
1) Harvesting and forwarding shall only occur between September 1st and March 15th to avoid impact to threatened / endangered species nesting periods.
2) No harvesting during gun deer opening weekend and a period between Thanksgiving and the close of gun deer season.
3) Logging operations can only occur during dry or frozen soil conditions. Portions (identified on map) may require frozen ground to seasonally saturated soil conditions.

Conversion Factors
1) The following weight conversion will be used in the conversion of weight scale to cords or cords to weight scale. Factors for mixed hardwood cordwood may be developed by weighted average of cruise estimates based on species volume distribution and or ocular estimates.

<table>

</tbody>
</table>

2) conversion of MBF (thousand board feet) to cords or cords to MBF shall be 2.20 cords per MBF for hardwoods and 2.44 Cords per MBF for conifers. The Scribner Decimal C Log Rule shall be used for scaling logs.

Special Conditions: Forest Health
1) The sale area is located within Sheboygan County, which is in the emerald ash borer quarantine zone. The logger should be aware of and comply with relevant EAB quarantine regulations.

**TOTAL TONS**: 3,345

*Ash sawlogs: Contains 20% Red Oak logs
**Mixed Hardwood Pulp – 73% Ash, 21% Elm, 4% Box Elder, 2% Cherry.
***Estimated tons are to a 4-inch top diameter and include top-wood.

**Sale Type & Payment Instructions**
This is a scaled sale on both Sawlogs (MBF) and Pulp (Tons). Payment for all products removed from the site must be made within 30 days from the time of billing under the deferred payment option.

**Sale Access and Landings**
Potential sale access and landings are off Division Rd, County Rd SS, Crooked Lake Rd, Haushalter Rd and Maple Tree Rd. Sites and designated skid trails have been identified, but will be agreed upon by the Forester and Logger. Accesses along County Highways may require county temporary culvert permits; which will be the responsibility of the Purchaser.

**Purpose of Sale**
The management objective for the majority of the harvest acreage is to maximize vigor and tree health by lowering basal area stocking using intermediate thinning process in conifer plantations. Ash was targeted for accelerated removal due to likely mortality by Emerald Ash Borer. Within aspen coppice areas (3 acres), management objective is to regenerate early successional species using even aged coppice regeneration harvests. Three conifer plantations (31 acres) were also designated to be clearcut, with a goal of converting site to hardwoods relying on advanced hardwood regeneration and
future planting. Two oak plantations (6ac) were marked using single tree selection methods to help promote growth and improve health.

**General Cutting Requirements**

1) **Conifer Thin Areas**: Row thinning designated by two Orange dots; Individual trees marked with Orange slash; Ash will be designated in these areas.
2) **Oak Thin Areas**: Orange slash denotes cut trees.
3) **Aspen Coppice**: Cut all trees greater than 2 inches in diameter.
4) **Conifer Clearcut**: Cull all trees, Expect green marked
5) **Green Paint** denotes reserve trees within coppice and clearcut boundaries.
6) **Purple Paint** denotes clearcut/coppice boundaries.
7) **Red Paint** denotes harvest area boundary.

**Special Operating Requirements**

1) Harvesting and forwarding shall only occur between **August 1st and March 15th** to avoid impact to threatened / endangered species nesting periods.

**Conversion Factors**

1) The following weight conversion will be used in the conversion of weight scale to cords or cords to weight scale. Factors for mixed hardwood cordwood may be developed by weighted average of cruise estimates based on species volume distribution and ocular estimates.

2) Conversion of MBF (thousand board feet) to cords or cords to MBF shall be 2.20 cords per MBF for hardwoods and 2.44 Cords per MBF for conifers. The Scribner Decimal C Log Rule shall be used for scaling logs.

**Special Conditions: Forest Health**

1) The sale area is located within Sheboygan County, which is in the emerald ash borer quarantine zone. The logger should be aware of and comply with relevant EAB quarantine regulations.

2) **Annosum Root Rot Treatment.** This sale requires the Purchaser to complete Annosum root rot preventative treatment between 4/1 – 11/30. Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either RotstopC or CELLU-TREAT (disodium octaborate tetrahydrate). Treatment should be made as soon as possible and no later than one day after harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions, but should be considered when submitting bids on these timber sales.

<td><strong>1,150</strong></td>
</tr>
</tbody>
</table>

*Estimated tons are to a 4-inch top diameter and include top-wood.

**Sale Type & Payment Instructions**
This is a scaled sale on Pulp (Tons). Payment for all products removed from the site must be made within 30 days from the time of billing under the deferred payment option.

**Sale Access and Landings**
Potential sale access and landing are off State Hwy 28, Kettle Moraine Drive, and Hickory Drive. Sites and designated skid trails have been identified, but will be agreed upon by the Forester and Logger. Accesses along County Highways may require county temporary culvert permits; which will be the responsibility of the Purchaser.

**Purpose of Sale**
The management objective for the majority of the harvest acreage is to maximize vigor and tree health by lowering basal area stocking using intermediate thinning processes (31ac). Ash was targeted for accelerated removal due to likely mortality by Emerald Ash Borer. Two small conifer clearcut’s (5ac) were established, with a goal of converting site to hardwoods relying on advanced hardwood regeneration and future planting.

**General Cutting Requirements**
1) **Conifer Thin Areas:** Orange slash denotes cut trees; Ash will be designated in these areas.
2) **Conifer Clearcut:** Cut all trees, Except those marked in Green.
3) **Green Paint** denotes reserve trees within coppice and clearcut boundaries.
4) **Purple Paint** denotes clearcut/coppice boundaries.
5) **Red Paint** denotes harvest area boundary.

**Special Operating Requirements.**
1) Harvesting and forwarding shall only occur between *September 1*st and *March 15*th to avoid impact to threatened / endangered species nesting periods.
2) **No access at any time will be permitted** in “NoEntry” area designated on map.

**Conversion Factors**
1) The following weight conversion will be used in the conversion of weight scale to cords or cords to weight scale. Factors for mixed hardwood cordwood may be developed by weighted average of cruise estimates based on species volume distribution and/or ocular estimates.
CORDWOOD WEIGHT CONVERSION FACTORS
POUNDS PER CORD

2) Conversion of MBF (thousand board feet) to cords or cords to MBF shall be 2.20 cords per MBF for hardwoods and 2.44 Cords per MBF for conifers. The Scribner Decimal C Log Rule shall be used for scaling logs.

Special Conditions: Forest Health

1) The sale area is located within Sheboygan County, which is in the emerald ash borer quarantine zone. The logger should be aware of and comply with relevant EAB quarantine regulations.

2) Anossum Root Rot Treatment. This sale requires the Purchaser to complete Anossum root rot preventative treatment between 4/1 – 11/30. Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either RotstopC or CELLU-TREAT (disodium octaborate tetrahydrate). Treatment should be made as soon as possible and no later than one day after harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions, but should be considered when submitting bids on these timber sales.

The award shall be based on this TOTAL BID AMOUNT:

Performance Bond

Will be in the form of: (select one)

- Cash
- Personal Check
- Certified Check/Money Order
- Irrevocable Letter of Credit
- Assurance Bond
- Certificate of Deposit
- Assignment of Savings Account

I understand that any or all bids may be rejected and that consideration and awarding of a contract will be based upon my past performance and ability to compete contracts. I also understand that if I am the winning bidder, I have 6 weeks from the date of the bid opening to submit an acceptable performance bond. I also understand that if I am awarded the contract and fail to execute it or work under it, I will be required to forfeit to the Department an amount equal to 10% of my total bid amount. Failure to forfeit the 10% penalty will result in being considered ineligible to bid on any state timber sales for a two-year duration. In the event the highest bidder can not or will not sign the contract, the award will be made to the next highest qualified bid.

Notice: I understand:

Utilization specifications and estimated volumes are listed in the prospectus which is available upon request from the Department.

A copy of the standard timber sales contract which must be entered into is available upon request from the Department.

*Estimated tons are to a 4-inch top diameter and include top-wood.

Sale Type & Payment Instructions
This is a lump sum sale on all Sawtimber (MBF) and Pulpwood (Tons). Payment may be split into 2 separate payments; 50% of total value prior to beginning harvest, remaining 50% when forester determines half of sale acreage is harvested.

Sale Access and Landings
Potential sale access and landing are off Division Road. Sites and designated skid trails have been identified, but will be agreed upon by the Forester and Logger.

Purpose of Sale
The management objective for the majority of the harvest acreage is to maximize vigor and tree health by lowering basal area stocking using a single tree selection (30 acres). Ash was targeted for accelerated removal due to likely mortality by Emerald Ash Borer. Within aspen coppice area (3 acres); management objective is to regenerate early successional species using even aged coppice regeneration harvest.

General Cutting Requirements
1) Orange Paint denotes trees to be cut.
2) Red Paint denotes the harvest unit boundaries.
3) Purple Paint denotes aspen coppice boundaries. Within Purple Paint cut all stems greater than 2 inch diameter.
4) Green Paint denotes reserve trees within coppice boundaries.

**Special Operating Requirements.**
1) Harvesting and forwarding shall only occur between August 1st and March 15th to avoid impact to threatened / endangered species nesting periods.
2) Logging operations can only occur during dry or frozen soil conditions

**Conversion Factors**
1) The following weight conversion will be used in the conversion of weight scale to cords or cords to weight scale. Factors for mixed hardwood cordwood may be developed by weighted average of cruise estimates based on species volume distribution and or ocular estimates.
