¹Mixed pulp includes approx. 33% of sugar maple, 56% of red maple, 5% yellow birch, 3% ironwood, and 3% of elm, white birch, and cherry. It also includes 8 MBF hard maple, 8 MBF red maple, and 2 MBF of yellow birch. ²Ash includes 27 MBF of saw. ³Basswood includes 5 MBF of saw. ⁴Balsam is approximately 80% balsam and 20% white spruce. ⁵Red pine includes 8 MBF of saw. Other species not mentioned will be charged the mixed pulp price.

The performance bond will be 15% of the total sale value. Contract length is approximately three years.

**SPECIAL SALE CONDITIONS:**

Equipment use will be restricted to very dry or frozen ground conditions. Some areas will need frozen ground conditions due to low, wet access into some areas. Portions of this sale are in the Flambeau River Scenic Management Area, operations within this area shall be conducted during leaf off (October 15th – March 31st).

**No Decking on West Lane.** To make areas of the sale operable during dry conditions, existing trails and new stub roads will most likely need gravel. The state will provide the gravel, but it will be the responsibility of the contractor for loading/hauling/leveling any gravel needed for decking on these existing roads and new stubs. Culvert placement has been completed by the state.

Access across private property (if desired) is the responsibility of the contractor.

If decking on Big Swamp Road, all slash and ends will be removed from the road and ditches concurrently with each truckload.

Use of a continuous rotating saw head will not be allowed in the select cut area due to density and distribution of regeneration.

All additional restrictions listed in prospectus and standard contract apply unless specified.
