Section 1: Prohibitions

A. Universal waste is not disposed on-site.

B. Universal waste is not diluted or treated on-site.

Note: Dilution or treatment does not include: sorting, mixing, discharging, regenerating, or disassembling batteries; removing batteries from consumer products or removing electrolytes; removing thermostat ampules; or, responding to a release of universal waste.

Section 2: General Standards

A. Universal waste batteries and thermostats that are broken or show evidence of leakage or spillage are placed in closed, structurally sound containers that are compatible with the waste and not leaking.

B. Universal waste pesticides and lamps are placed in closed, structurally sound containers that are compatible with the waste and not leaking.

C. Sorting, mixing or handling of batteries is only conducted if the battery casing is not breached and remains intact.

D. Wastes generated by handling or cleaning up spills of universal wastes are managed according to hazardous waste or solid waste rules.

E. If mercury containing ampules are removed from thermostats, the handler meets ALL of the following:
   1. Ampules are removed in a manner that prevents breakage.
   2. Removal is conducted over a containment device.
   3. Spills or leaks are cleaned up immediately.
   4. Removal is performed in a well ventilated, monitored environment.

F. Pesticides are placed in a tank that meets NR 665 subch. J requirements, except closure and post closure requirements in NR 665.0197(3) and waste analysis requirements in NR 665.0200.

G. Pesticides are placed in a transport vehicle or vessel that is closed, structurally sound, not leaking and compatible with the waste.

H. All universal wastes are labeled or marked "Waste" or "Used" followed by the specific type of universal waste handled or "Universal Waste".

I. Containers, tanks, or transport vehicles of recalled pesticides are additionally marked with the label that was on or accompanied the product when it was sold or distributed.

J. Length of accumulation time is demonstrated by ANY of the following:
   1. Mark or label each container with the earliest date the waste is generated or received.
   2. Mark or label the individual item of waste with the date it was generated or received.
   3. Maintain an inventory system identifying the date the waste was generated or received.
   4. Place the universal waste in a specific accumulation area identified with the earliest date the waste was generated or received.
   5. Use some other method that clearly demonstrates the length of accumulation time.

K. Universal waste is accumulated for less than one year from the date generated or received from another handler.
### Section 2: General Standards

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1. If universal waste is accumulated beyond one year, the handler can prove that accumulation was necessary to facilitate proper recovery, treatment or disposal.</td>
<td>673.35(2)</td>
</tr>
<tr>
<td>2. Employees are trained on the proper handling and emergency procedures appropriate to the types of waste handled at the facility.</td>
<td>673.36</td>
</tr>
</tbody>
</table>
| 3. Handler complies with ALL of the following when a release occurs:  
   1. Immediately contains the release.  
   2. Determines if the spill residue is hazardous waste.  
   3. If hazardous waste, disposes of it as such. | 673.37 |
| 4. EPA ID# was obtained before meeting or exceeding 5,000 kg (11,025 lb). | 673.32(1) |

### Section 3: Off-site Shipments

<p>| | |</p>
<table>
<thead>
<tr>

<tbody>
<tr>
<td>A. Handler sends the waste to a destination facility, foreign destination or another handler.</td>
<td>673.38(1)</td>
</tr>
</tbody>
</table>
| B. Handler that self-transports complies with ALL of the following:  
   1. Applicable US DOT regulations in 49 CFR parts 171 to 180 when transporting universal waste that meets the definition of hazardous materials.  
   2. Immediately contain release and make waste determination on spill residue.  
   3. If shipped to a foreign destination other than an OECD country, use an EPA acknowledgement of consent. | 673.38(2) |
| C. For hazardous materials, the handler packages, labels, marks, placards and prepares the proper shipping papers in accordance with DOT requirements in 49 CFR parts 172 to 180. If no pretransportation activities are taking place during the inspection answer as 'NA' | 673.38(3) |
| D. If shipping to another universal waste handler, the handler has agreed to receive the shipment. | 673.38(4) |
| E. If a shipment was rejected, EITHER of the following occurred:  
   1. The waste was sent back to the originating handler.  
   2. The originating handler agreed on a destination facility to which to ship the waste. | 673.38 |
| F. The handler immediately notifies the Department if they receive a shipment containing hazardous waste. | 673.38(7) |
| G. Nonhazardous, nonuniversal waste in a universal waste shipment is managed in compliance with the solid waste requirements. | 673.38(8) |

### Section 4: Record Keeping

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| A. Records for each shipment of universal waste received at the facility contains ALL of the following information:  
   1. The name and address of the originating handler or foreign shipper.  
   2. The quantity of each type of universal waste received.  
   3. The date the shipment was received. | 673.39(1) |
### Section 4: Record Keeping

B. Records for each shipment of universal waste sent off-site contain the following information:

1. The name and address of the facility to which the waste was sent.
2. The quantity of each type of universal waste sent.
3. The date the shipment of universal waste left the facility.

   - [ ] 673.39(2)

C. Records are retained for at least 3 years from the date the shipment was received or from the date the shipment left the facility.

   - [ ] 673.39(3)
