Inflation factors are derived from the most recent implicit price deflator for gross domestic product published by the U.S. Department of Commerce in its *Survey of Current Business* (www.bea.gov/scb). The annual inflation factor is the result of dividing the latest published annual deflator by the deflator for the previous year.

* Until the third estimate is published around March of the following year, the annual inflation factor is assumed to be the same as for the previous year.
