*BEPI Calculation = 20 or greater

Native vegetation to be seeded from the OHWM to the top of bank along entire shoreline. Woody vegetation, such as shrubs, will compose at least 50% of the seed mixture.

All stone above OHWM will be topdressed with a minimum of 6” of top soil.

1.5:1 Side Slope

Filter Fabric

Varying sizes of clean field stone from 6-24” in diameter

Storm Wave Height. Determined by Shoreline Energy Calculator.

Allow aquatic vegetation to remain. Do not remove.

Ordinary High Water Mark (OHWM)
The placement of riprap will not result in the removal of more than 20% of existing natural bank vegetation.

100' of riprap placed here along natural contour of shoreline.
