**Proposed Materials**
Approx. 160 yd³ of clean field stone – varying from 6" to 24" diameter.
Native non-invasive grasses & shrubs.
Filter fabric

**Project Plans** (Include top view and typical cross sections. Clearly identify features and dimensions or indicate scale.)
Use additional sheets if necessary.

The placement of riprap will not result in the removal of more than 20% of existing natural bank vegetation.

100’ of riprap placed here along natural contour of shoreline.

Native non-invasive vegetation seeded above the OHWM. Woody vegetation, such as shrubs or willow stakes, will compose at least 50% of the seed mixture.

**Cross Section**

**Storm Wave Height**
As Determined by Shoreline Energy Calculator.

Ordinary High Water Mark (OHWM)

Allow aquatic vegetation to remain. Do not remove.
