Executive Summary Exec Sum - 2

Table of Contents.....

Introduction..... 1

Chapter 1. Targeting/Priority Setting..... 4

1.1 EPA and Gulf Hypoxia Task Force Expectations..... 4

1.1.1 Nutrient Reduction Framework Expectation:..... 4

1.1.2 Gulf Hypoxia Task Force Essential Strategy Component 5

1.2 Wisconsin’s Approach..... 7

1.2.1. Geographic Extent of Nutrient Sources 7

1.2.2. Geographic Targeting/Priority Setting..... 10

1.2.3 Models and Monitoring Data..... 20

1.2.4 Urban Watersheds..... 21

1.2.5 Targeting within Watersheds 21

1.3 Future Directions..... 22

Chapter 2. Setting Nutrient Reduction Targets 24

2.1 EPA and Gulf Hypoxia Task Force Expectations 24

2.1.2 Gulf Hypoxia Task Force Essential Strategy Component 24

2.2 Wisconsin’s Approach..... 24

2.2.1 Analytical Tools 25

2.2.2 Current Status 26

2.2.3 Nutrient Trends..... 29

2.2.4 General Approach for Nutrient Management in Wisconsin..... 31

2.2.5 Mississippi River Basin/Gulf Hypoxia – 45% Reduction Goal 32

2.2.6 Lake Michigan – Estimated Phosphorus Load Reduction 39

2.2.7 Total Maximum Daily Load Analyses..... 42

Chapter 3 – Point Source Permits..... 43

3.1 EPA and Gulf Hypoxia Task Force Expectations 43

3.2 Wisconsin’s Approach..... 43

3.2.1 Permits for Municipal and industrial wastewater treatment facilities 44

3.2.2 CAFO permits..... 46

3.2.3 Municipal Storm Water Discharge Permits..... 47

3.3 Future Directions..... 48

Chapter 4. Agricultural Nonpoint Nutrients 49

4.1 EPA and Gulf Hypoxia Task Force Expectations 49

4.2 Wisconsin’s Approach..... 49

4.2.1 Agricultural Performance Standards and Prohibitions..... 49

4.2.2 Best Management Practices for Nonpoint Source Pollution Control..... 51

4.2.3 Programs intended to control agricultural nitrogen and phosphorus 52

4.2.4 Forums for coordination and engagement..... 57

4.3 Future Directions..... 58

Chapter 5. Integrating Point Source and Nonpoint Source Management..... 61

5.1 Total Maximum Daily Loads (TMDLs)..... 61

5.2 PRESTO 63

5.3 Watershed Adaptive Management Option	65
5.4 Water Quality Trading	65
Chapter 6. Storm Water and Septic Systems.....	66
6.1 EPA and Gulf Hypoxia Task Force Expectations	66
6.2 Wisconsin’s Approach.....	66
6.2.1 Construction Sites, Post-Construction Sites, and Non-Permitted Municipalities.....	66
6.2.2 Septic Systems.....	67
6.2.3 Lawn Fertilizer.....	68
6.2.4 Phosphorus in Detergents.....	69
6.3 Future Directions.....	69
Chapter 7. Accountability and Verification Measures.....	70
7.1 EPA and Gulf Hypoxia Task Force Expectations	70
7.2 Wisconsin’s Approach.....	70
7.2.1 Point Source Tracking.....	70
7.2.2 Watershed based nutrient tracking for practices to reduce Nonpoint Sources	70
7.3 Future Directions.....	71
Chapter 8. Water Quality Monitoring.....	74
8.1 EPA and Gulf Hypoxia Task Force Expectations	74
8.2 Wisconsin’s Approach – Surface Water	74
8.2.1 Coordination of water monitoring efforts	74
8.2.2 Key Monitoring Program Components	75
8.3 Wisconsin’s Approach – Groundwater and Drinking Water.....	79
8.3.1 Coordination of water monitoring efforts	79
8.3.2 Key Monitoring Program Components	79
8.4 Future Directions for Monitoring Improvement.....	82
8.4.1 Surface Water Monitoring.....	83
8.4.2 Groundwater Monitoring.....	84
8.4.3 Moving Forward	85
Chapter 9. Reporting.....	86
9.1 EPA and Gulf Hypoxia Task Force Expectations	86
9.2 Wisconsin’s Approach.....	86
9.3 Future Directions.....	86
Chapter 10. Numeric Nutrient Water Quality Criteria	87
10.1 EPA and Gulf Hypoxia Task Force Expectations	87
10.2 Wisconsin’s Approach and Future Directions	87
Phosphorus Criteria.....	87
Nitrogen Criteria – Surface Waters.....	88
Appendix 1. Wisconsin’s Nutrient Reduction Strategy HUC 10 Data Table.....	A-Error!
Bookmark not defined.	
Appendix 2. Wisconsin Watershed Rotation Water Quality Monitoring Data (Pour Point data)	B-1
