e-Manifest Fact Sheet: Receiving Facilities

EPA is establishing a national system for tracking hazardous waste shipments electronically. This system known as “e-Manifest,” will modernize the nation’s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. EPA is establishing e-Manifest per the Hazardous Waste Electronic Manifest Establishment Act, which Congress enacted into law on October 5, 2012. e-Manifest is a multi-faceted program that includes system development; regulation and policy; implementation and communication; and consultation with the e-Manifest federal advisory committee.

What Receiving Facilities Need to Know

- Receiving facilities will have the option to create and submit manifests electronically in e-Manifest.
- Receiving facilities may continue to use paper manifests after June 30, 2018; however, use of e-Manifest is highly encouraged by EPA.
- Receiving facilities can use the e-Manifest system to meet manifest recordkeeping requirements under the Resource Conservation and Recovery Act (RCRA) regulations.
- Receiving facilities must submit all manifests, both paper and electronic, to EPA.
- EPA will charge receiving facilities a fee for each manifest submitted. Fees are differentiated based on how the manifest is submitted.
- Receiving facilities must obtain an EPA Identification number for billing purposes. To obtain an EPA ID number, receivers can submit EPA’s Site Identification form (EPA form 8700-12).
- Existing 6-copy manifest form is being replaced with a new 5-copy form. The new form will be effective starting on June 30, 2018.

Very Small Quantity Generator waste (if manifest used voluntarily or required), and
Imported hazardous waste.

EPA will implement the e-Manifest regulations until Resource Conservation and Recovery Act (RCRA) authorized states adopt and become authorized for the e-Manifest regulations. (Note: some parts of the e-Manifest regulations, such as collection of user fees, will only be implemented by EPA.)

How Receiving Facilities Will Be Impacted

- The e-Manifest Act mandates that the system must cover waste shipments for which either federal or state law require a RCRA manifest for their tracking. Shipments of state-regulated wastes that are not federal RCRA wastes, but that are subject to the manifest under state law, by either the origination state or the destination state, must be included in the system. Conversely, if a shipment is voluntarily shipped on a manifest (i.e., not required to be manifested under either state or federal law), these manifests are not required to be submitted to EPA.
- Receiving facilities must register with the e-Manifest system to receive and pay invoices for submittal of manifests to EPA. Registering with e-Manifest also allows receiving facilities to view electronic copies of completed manifests, make corrections and minimize the costs of submitting manifests.

Scope of e-Manifest

e-Manifest will facilitate the electronic transmission of the uniform manifest form, which accompanies shipments of hazardous waste. e-Manifest affects any regulated waste shipped on a manifest, including:

- RCRA federal hazardous waste,
- Regulated PCB waste shipped on a manifest,
- State-regulated hazardous waste (if manifest is required by origination or destination state),
What Receiving Facilities Need to Do

Obtain EPA ID Number
State-regulated waste receiving facilities must obtain an EPA ID number (e.g. “WIR123456789”) to register with e-Manifest to ensure that their site information is available in RCRAInfo. To obtain an EPA ID Number:

- Submit an EPA form 8700-12 to your RCRA-authorized state or EPA Region. The form can be found on RCRAInfo Web at https://rcrainfo.epa.gov/rcrainfoweb.
- In Wisconsin, sign up can be done electronically through MyRCRAid, also in RCRAInfo. Check here for other states that provide this option. https://rcrainfo.epa.gov/rcrainfoweb/modules/main/state_contacts.html.

Work with Customers to Select Manifest Creation Option
The e-Manifest system allows for three types of hazardous waste manifest creation options:

- Paper (generator, transporter, and receiving facility all sign on paper)
- Hybrid (manifest is created electronically in e-Manifest. A hard copy is printed from the system and signed by the generator and initial transporter. The signed hard copy is left with the generator, while the remainder of the manifest shipment is executed in the electronic system. The manifest is signed electronically by the initial transporter, any subsequent transporters and the receiving facility.)
- Electronic (created in e-Manifest and electronically signed by all entities listed on the manifest)

Beginning on June 30, 2018, all receiving facilities must submit manifests to EPA. Electronic and hybrid manifests are submitted to EPA instantaneously, as they are signed electronically by the receiving facility in the system. EPA’s Cross-Media Electronic Reporting Rule (CROMERR) provides the legal framework for electronic reporting under EPA’s regulatory programs. Those signing electronically need to go through identity proofing plus sign using a CROMERR-compliant electronic signature (e.g., password plus personal challenge question). If a paper manifest is used, the receiving facility must submit the manifest to EPA within 30 days of receipt. Receiving facilities can utilize the EPA’s e-Manifest website to create electronic manifests for their clients or they can utilize the e-Manifest API (Advanced Programming Interface) to add e-Manifesting capabilities to their existing manifesting system.

Select Manifest Submission Options and Associated Fee
Receiving facilities have several options for submitting manifests to EPA. EPA will charge a fee for every manifest submitted to the system based on the manifest type and mode of submission. Each manifest submission option has a different associated fee:

- Mailed paper forms incur the highest fees.
- Scanned image file and data + scanned image file uploads will incur moderate fees.
- Electronic manifest, including hybrid manifest, will incur the lowest fees.

EPA will publish user fees on the e-Manifest website.

Register with e-Manifest
e-Manifest registration and instructions will be available at: www.epa.gov/e-Manifest. Users can register for different permissions related to whether they want to view, create, and/or sign manifests electronically. Each user must register separately. Additionally, EPA encourages receiving facilities to register at least two “Site Managers” per EPA ID who, in addition to all the permissions above, can also approve other users in their company for e-Manifest access.

Wisconsin & EPA Region 5 Contacts
Department of Natural Resources:
Receiving facilities in Wisconsin are defined as facilities accepting/receiving non-hazardous or state-specific hazardous wastes on a uniform hazardous waste manifest. These facilities are not licensed treatment, storage and disposal facilities. Receiving facilities may include wastewater treatment facilities, licensed landfills, used oil processors and other facilities that accept non-hazardous or state-specific hazardous wastes on a uniform hazardous waste manifest for processing, treatment or disposal.
