SECTION IV: ELIGIBILITY CHECKLIST

1. What is the receiving water for your discharge, not including discharges of domestic wastes? If your facility has more than one outfall (an outfall is an individual discharge point, like a pipe, channel, or seepage pond, that wastewater enters prior to discharging to a receiving water), indicate in the space provided which outfalls go to groundwater and which go to surface waters. (check all that apply)

☐ Groundwater (this includes infiltration of wastewater through the soil via irrigation, septic systems and associated drain fields, ditches, absorption ponds, etc.).
  Outfall #(s):_______________________________________________________________

☐ Surface Water (this includes creeks, streams, rivers, and lakes and any ditches, stormsewers, and pipes that convey wastewater to a creek, stream, river, and lake).
  Outfall #(s):_______________________________________________________________

What is the name of the surface water your discharge enters?

How far is it from the point where it leaves your plant until it reaches the surface water (how far does it travel through storm sewers or drainage ditches)? (Check one):

☐ Less than 1000 feet
☐ Between 1000 and 5000 feet
☐ Greater than 5000 feet

Sanitary Sewer (discharge to a Publically Owned Treatment Works). A septic system is not considered a sanitary sewer. If all discharges from your facility go to a sanitary sewer, you do not require regulation under a WPDES discharge permit. Therefore, skip the rest of the checklist and sign page 4. We will remove you from our tracking system. If at some point in the future operations at your facility result in a discharge, you will need to inform the Department. If only some or no discharges from your facility go to the sanitary sewer, identify the receiving water for the other discharges below.

For facilities with discharges to groundwater or surface waters, continue on to question #2.

For Department Use Only:

☐ Eligible

☐ F & AL: Meets TEVs?
  Spring ☐ Yes ☐ No
  Summer ☐ Yes ☐ No
  Fall ☐ Yes ☐ No
  Winter ☐ Yes ☐ No

☐ Non- F & AL: Great Lakes
  TEV = 120°F

☐ Ineligible

☐ ERW
☐ ORW

2. Are any of the following wastewaters from your facility discharged to surface waters or groundwater? (check all that apply)

☐ No ☐ Yes Contact cooling water.

☐ No ☐ Yes Water from boiler cleaning operations.

☐ No ☐ Yes Air compressor condensate contaminated with oil and grease.

☐ No ☐ Yes Water softener regeneration backwash.

☐ No ☐ Yes Other process wastewaters (wastewaters that come in contact with or are the result of production operations at a facility).

If you answered yes to any of the above, your discharge is not eligible for this general permit. Skip the rest of the checklist and complete the signatory requirements on page 4. Contact the Department to obtain application for an individual WPDES discharge permit. If you answered no to all of the above, continue on to question #3.

(Continued on next page)
SECTION IV: ELIGIBILITY CHECKLIST

3. To the fullest extent of your knowledge, does your discharge contain any of the substances listed below or other substances that would be harmful to animal, plant, aquatic life (metals, volatile compounds, etc.)?

- alpha - BHC
- beta - BHC
- gamma - BHC (Lindane)
- delta - BHC
- Chlor dane
- 4,4'-DDD
- 4,4'-DDE

- 4,4'-DDT
- Dieldrin
- Hexachlorobenzene (PCB)
- Hexachlorobutadiene
- Mirex
- Octachlorostyrene

- Polychlorinated Biphenyls (PCB)
- Pentachlorobenzene
- Photomirex
- 1,2,3,4-Tetrachlorobenzene
- 1,2,4,5-Tetrachlorobenzene
- 2,3,7,8-Tetrachlorodibenzo-p-dioxin
- 1,2,4,5-Tetrachlorobenzene

☐ No. Continue on to question #4.

☐ Yes. Your discharge is not eligible for this general permit. Skip the rest of the checklist and complete the signatory requirements on page 4. Contact the Department to obtain application for an individual WPDES discharge permit.

4. Does your discharge flow to a wetland?

No. Continue on to question #5.

Yes. The Department will need to determine if your discharge causes significant adverse impacts to wetlands. Continue on to question #5.

5. Are Water Treatment Additives used in wastestreams that are discharged to surface waters or groundwater (scale and rust inhibitors, biocides such as chlorine, etc.)?

☐ No.

a. Do all discharges from your facility go to groundwater (see your answer to question #1)?

   No Yes

b. Did you answer no to question #4?

   No Yes

If you answered yes to both questions a. and b. above, your discharge is eligible for the general permit. Complete the signatory requirements on page 4. Read the attached permit and comply with its requirements, submitting annual summaries as required by the permit. Facilities with discharges to surface waters also complete the signatory requirements on page 4. However, surface water discharges will need additional Department review to determine if your facility is eligible for this general permit.

☐ Yes.

Is the additive considered a biocide (biocides are designed to control biological growth, such as algae, in tanks, cooling towers, and other equipment)?

☐ No ☐ Yes

For each additive used, you must submit the following information in order for the Department to determine eligibility for this general permit:

a. Commercial name of the additive to be used.
b. Amount or concentration of additive to be used.
c. Anticipated discharge concentration of additive.
d. Proposed frequency of usage.

If your discharge enters a surface water, you must also submit the following information:

e. At least one 48-hour LC50 or EC50 value for Ceriodaphnia dubia or daphnia magna, and at least one 96-hour LC50 or EC50 value for either fathead minnow, rainbow trout, or bluegill. The toxicity values must be based on the whole product rather than components or active ingredients.

NOTE: The above information should be provided to you by your additive supplier.
SECTION V: SIGNATORY REQUIREMENTS

This form must be signed by the official representative of the permitted facility who is: the owner; the sole proprietor for a sole proprietorship; a general partner for a partnership; a ranking elected official or other duly authorized representative for a unit of government; a member or manager for a limited liability company; or, for a corporation, by a responsible corporate officer including a president, secretary, treasurer, vice president, manager, or a duly authorized representative having overall responsibility for the operation of the facility for which this permit is issued. If this form is not signed, or is found to be incomplete, it will be returned.
