

How to use the Well Driller Viewer – Mobile Friendly Map

Last Updated 7/29/2019

Viewing inspection data on a smartphone

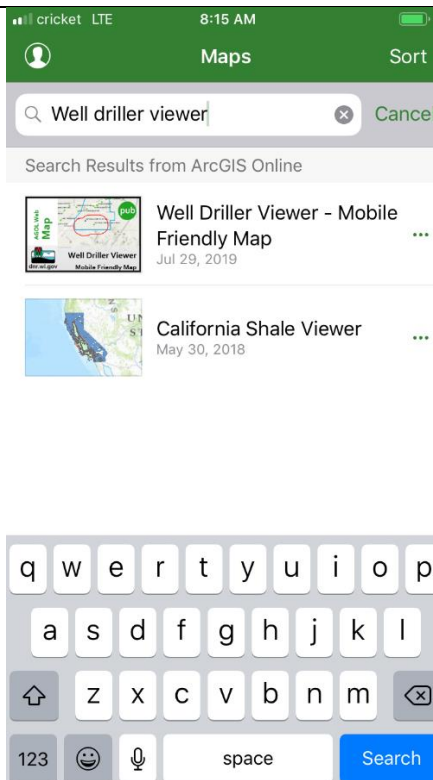

On your phone, download the app called Explorer for ArcGIS.

Click "Continue Without Signing In".

In the search box, type “Well Driller Viewer”. When “Well Driller Viewer – Mobile Friendly Map” comes up, click on it.

Search for a location using the “magnifying glass” tool at the top. When a place comes up, just click on it to zoom there. You can now click a feature on the map to find out what it is. Visible layers include:

- Private well locations (once you are zoomed in close)
- Dual Aquifer
- Landfills Buffered
- Special Casing Areas
- Remediation Sites
