

October 27, 2014

Hi Jennifer

Once again I am asking for your help in entering the data for the Clean Boats program. I have included all of our copies for this year. I have also included a copy of our camera data from the boat landing for 2013. I will forward 2014 when completed.

Thanks for all of your help.

A handwritten signature in black ink, appearing to read "Gordon Kill". The signature is written in a cursive style with a long, sweeping underline that extends to the left.

Gordon Kill/Vice-Chairman

Big Round Lake District

CC: Doug Jaeger

2013 Video Review Worksheet

Lake: Big Round Lake

Launch: Big Round

The I-LIDS was initially installed and operational on May 22, 2013. 5,541 videos were captured.

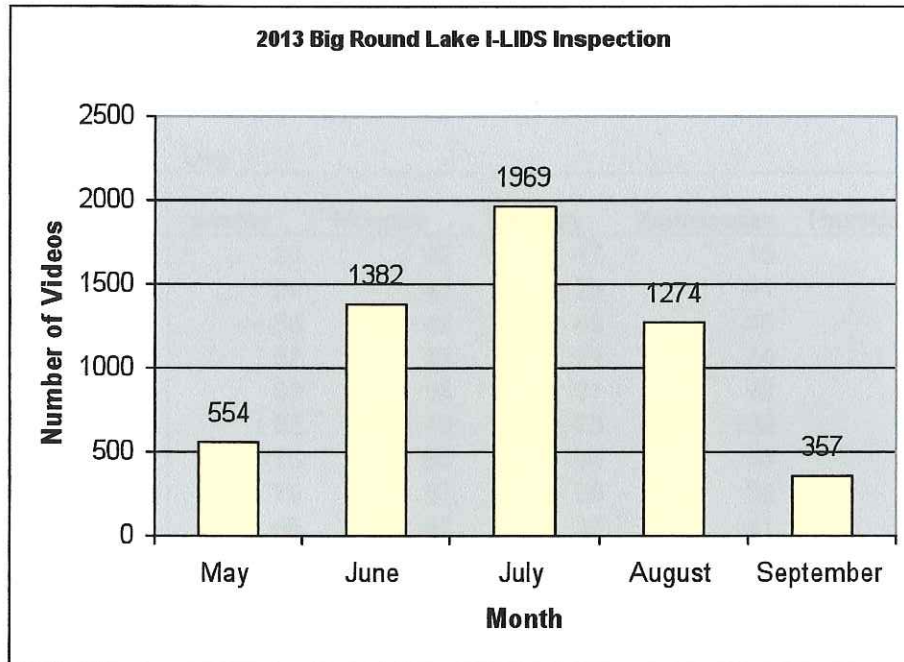

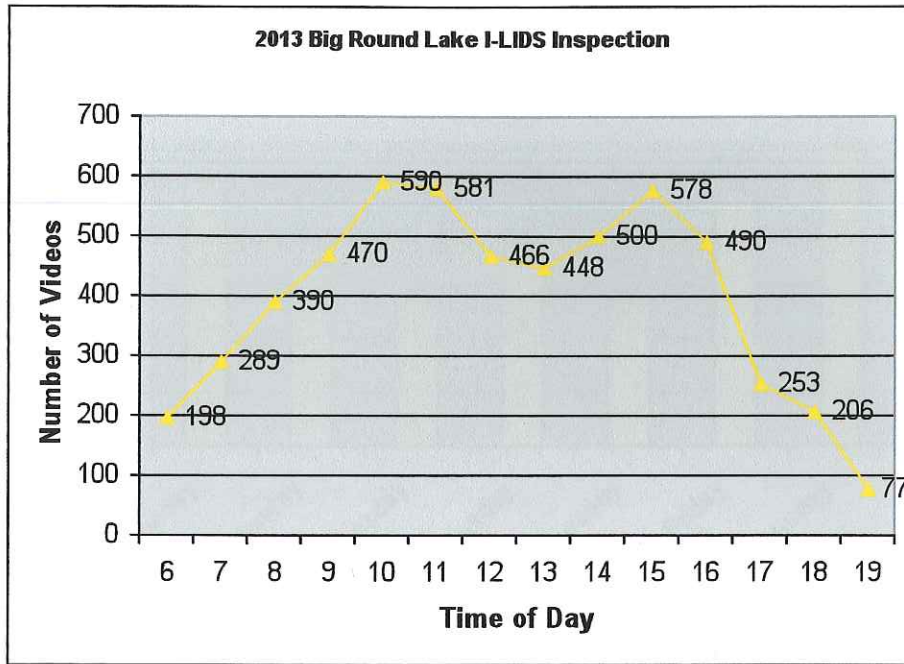

186 launches out of a sample size of 1101 videos reviewed here or 16.9% of videos were launches. Based on 5541 actually captured, we would estimate that there were 936 launches captured by the I-LIDS over the season (up from 755 in 2012).

Out of the 1353 videos reviewed there were 2 suspect violations reported to the District. The District should take steps to review all of the videos or to have our company help in reviewing the balance.

The trees to the south of the solar panel have grown up, which affects operation later in the year. It is recommended to have a new post and line run to the I-LIDS that would offer improved solar power (see attached image (taken 9/26/13) to see suggested location 25' to the east).

Statistics showing frequencies of boat activity are attached which should guide the District in determining when to staff the launch with volunteer inspectors.
