

# Pike River north of mouth to Lake Michigan

## Road Salt Monitoring Data Summary September 2011 – December 2012

**Volunteers** Katie Jones, Christine Blaine, Rachel Martin, Jordan Burkholder, and Tom Baran. Photo courtesy of Jim Beecher

### Specific conductance summary:

- 8 measurements taken
- Minimum: 360  $\mu\text{S}/\text{cm}$  on 9/18/2012
- Maximum: 800  $\mu\text{S}/\text{cm}$  on 2/29/2012
- Mean: 563  $\mu\text{S}/\text{cm}$

### Chloride ( $\text{Cl}^-$ ) summary:

- 12 samples collected
- Minimum: 28.6 mg/L on 2/29/2012
- Maximum: 108.5 mg/L on 11/6/2012
- Mean: 65 mg/L

### EPA Acute and Chronic Exceedences for Chloride<sup>1</sup>:

Neither the EPA acute chloride standard of 860 mg/L nor the chronic chloride standard of 230 mg/L was exceeded at this site based on volunteer monitoring in 2011 or in 2012.

### Results Over Time<sup>2</sup>:

<sup>1</sup> Acute standard: The one-hour average should not exceed 860 mg/L more than once every three years. Chronic standard: The four day average should not exceed 230 mg/L more than once every three years. Source: EPA. 1988. Ambient Water Quality Criteria for Chloride. EPA 440/6-88-001.

<sup>2</sup> Calculated chloride: When  $\text{SC} > 1540 \mu\text{S}/\text{cm}$  was  $\text{Cl} = 0.3441 * \text{SC} - 291$ ,  $\text{adj}R^2 = 0.98$ ; when  $\text{SC} \leq 1540 \mu\text{S}/\text{cm}$  was  $\text{Cl} = 1.044 * (\exp(0.001609 * \text{SC} + 3.046))$ ,  $\text{adj}R^2 = 0.65$ . Equations based on data from both Madison and Milwaukee.
