Subject: Performance Standards and Prohibitions

Mr. Seefeldt,

Thank you for your recent efforts to protect our County's water resources. The Wisconsin DNR requires us to acknowledge you have successfully implemented nonpoint source pollution control best management practices on your farm under the Targeted Runoff Management Program cost-share agreement 14-Seefeldt-01 signed 5/29/14. Installing practices under this agreement has brought you into compliance with performance standards and prohibitions as described in the table below.

Name and Citation of Standard/Prohibition	Identification of Parcel(s) Where Compliance Was Achieved
Animal waste and barnyard runoff performance standards and prohibitions met	14-00028.000

In accordance with ch. NR 151, Wis. Adm. Code, any cropland practice or livestock facility brought into compliance with a state performance standard or prohibition must remain in compliance in perpetuity regardless of future cost sharing. Since you are now deemed in compliance with state standards and prohibitions as identified above, it is required that you and any future landowners or operators maintain compliance with the standards and prohibitions at the parcels identified.

This letter only addresses the compliance status on your farm resulting from practices installed under the cost share agreement identified above. There may be additional information on file for your farm concerning your compliance status with state performance standards and prohibitions. If you have any further questions, please contact me at 715-732-7783 or gcleereman@marinettecounty.com.

Sincerely,

Greg Cleereman
Marinette County Conservationist
