

Data Collectors <i>Tina Wolbers & Michelle Balk</i>			Date <i>08/04/2011</i>
Lake Name <i>Mud Lake</i>		County <i>Columbia</i>	WBIC <i>1266100</i>
Start Time	End Time	Secchi Depth feet or meters (circle one)	Conductivity

Used canoe to do survey (too shallow for boat)

Look for the following species: Purple loosestrife, Phragmites, flowering rush, Hydrilla, Brazilian waterweed, Eurasian water-milfoil, curly-leaf pondweed, yellow floating heart, zebra mussel, quagga mussel, Chinese mystery snail, banded mystery snail, faucet snail, New Zealand mud snail. List any other AIS found.

STEP 1: Record locations of sites (in decimal degrees) using a GPS unit (datum WGS84). List AIS found at each site or record none. Collect a sample of any suspected AIS found.

NO INVASIVES FOUND

Step 2: Label each specimen collected with species, collector, date, lake name, WBIC and Location #

10/2/15 proofed JS

Step 3: Data was entered into SWIMS on 8/22/2011 by Tina Walters
Date Name

Notes:

Density Ratings

- 1 – A few plants or invertebrates
- 2 – One or a few plant beds or colonies of invertebrates
- 3 – Many small beds or scattered plants or colonies of invertebrates
- 4 – Dense plant, snail or mussel growth in a whole bay or portion of the lake
- 5 – Dense plant, snail or mussel growth covering most shallow areas

General guidance on areas to search for the 10 minute quick snorkel search sites:

- Check rocks for zebra/quagga mussels, faucet snails and New Zealand mudsnails.
- Check around small backyard boat launches.
- Check near creek inlets (especially if AIS are found upstream).
- Check the stems of emergent vegetation for climbing faucet snails.
- Check areas downwind of large boat landings.
