Lake Name Gordon	County Ashland	WBIC 2406500	AIS sign? Y N	Secchi (ft or m) 1.5'	Conductivity (ZM tow if ≥99 umhos/cm)
Date(s) 8-27-13	Data collectors	Start time (nearest 15 min) 3:00 12:30	End time (nearest 15 min) 3pm	Total collector time (hrs x # collectors) 16.5	

Look for the following species: Purple loosestrife, Phragmites, flowering rush, Hydrilla, Brazilian waterweed, Eurasian water-milfoil, curly-leaf pondweed, yellow floating heart, zebra mussel, quagga mussel, Chinese mystery snail, banded mystery snail, faucet snail, New Zealand mud snail, didymo, water flea, and any other AIS found.

STEP 1: Record locations of sampling sites (in decimal degrees). Sampling sites include all public boat landings (BL), 5 targeted sites (TS) and the meander survey sites (MS). List AIS found at each site or record none. Collect a sample of any new AIS found. Collect five new invasive plant specimens, 20 Dreissenids, and 30 of each snail species and label with species, collector, date, lake name, WBIC and sampling site.

Site	Latitude	Longitude	Snorkel (Y or N*)	If N snorkel, indicate why†	Species, density 1-5‡
1	46.16722	90.61284	-	clarity	Mystery snail - 2
2	46.16479	90.61471	-	clarity	Mystery snail - 3
3	46.16000	90.61787	-	clarity	* Freshwater sponge
4	46.16503	90.62294	-	In between location	locust black? mystery snail - 2
5	46.16784	90.62243			* Japanese barberry * turtle head
Timber Lodge	see photo				Phragmites
BL1	46.1694	90.6130	N		BMS = 2
Beach	46.1690	90.6125			BMS = 3
Lotus	46.1698	90.6142			

* For lakes/sites not snorkeled, substitute:

Boat landing site - 15 rake throws and 15 D-net samples OR 30 minutes, whichever comes first

Targeted site - 5 rake throws and 5 D-net samples OR 10 minutes, whichever comes first

50 meander sites - 10 rake throws and 10 D-net samples during meander survey between sampling sites for a total of 50 meander survey sites

† If lake/site was not snorkeled, indicate why: stained water, turbid water, blue-green bloom, chemical treatment, other (please describe).

‡ Density Ratings

1 – A few plants or invertebrates

2 – One or a few plant beds or colonies of invertebrates

3 – Many small beds or scattered plants or colonies of invertebrates

4 – Dense plant, snail or mussel growth in a whole bay or portion of the lake

5 – Dense plant, snail or mussel growth covering most shallow areas

Step 2: Collect Waterflea Tows from 3 sites: the deep hole (DH) and 2 other sites in water deeper than 15 feet (if possible). Submit sample and Water Flea To Monitoring Reprt form to Science Services.

Site	Depth sampled	Method (hor, obliq, vert)	Net diameter (30 or 50 cm)	Ethanol added (Y or N)	Samples combined (Y or N)	Sample sent to, date
1	14'	hor	"	Y	Y	
2	18'	"	"	Y	Y	
3	16'	"	"	Y	Y	

Step 3: Collect Veliger Tows from 3 sites; the deep hole (DH), outlet site (OS), and or downwind site (DS) in water depth of about 4 meters (if possible). Submit sample and Mussel Veliger Tow Monitoring Report form to Science Service.

Site	Depth sampled	Net diameter (30 or 50 cm)	Ethanol added (Y or N)	Samples combined (Y or N)	Sample sent to, date

Step 4: Were plant voucher specimens submitted? Yes No (circle) If yes, where? (circle) Freckmann Herbarium, Other note on American Lotus

Step 5: Were snail voucher specimens submitted (separate into Chinese, banded, all others)? No (circle) If yes, where? (circle) JW La Crosse, or Other _____

Step 6: Data was entered into SWIMS on 10/3/13 by DICD

Step 7: Data was proofed on 10/23/13 by DICD

Notes:
