

Entered

Lake Name Upper Buckatawbin	County Vilas	WBIC 1621800	AIS sign? <input checked="" type="radio"/> N	Secchi (ft or m)	Conductivity (ZM tow if ≥ 99 umhos/cm) 64
Date(s) 8/13/13	Data collectors Jason H. & Randal, U Benwick	Start time (nearest 15 min) 10 AM	End time (nearest 15 min) 1:45 pm	Total collector time (hrs x # collectors) 11 hrs 15 min	

Look for the following species: Purple loosestrife, Phragmites, flowering rush, Hydrilla, Brazilian waterweed, Eurasian water-milfoil, curly-leaf pondweed, yellow floating heart, zebra mussel, quagga mussel, Chinese mystery snail, banded mystery snail, faucet snail, New Zealand mud snail, didymo, water flea, and any other AIS found.

STEP 1: Record locations of sampling sites (in decimal degrees). Sampling sites include all public boat landings (BL), 5 targeted sites (TS) and the meander survey sites (MS). List AIS found at each site or record none. Collect a sample of any new AIS found. Collect five new invasive plant specimens, 20 Dreissenids, and 30 of each snail species and label with species, collector, date, lake name, WBIC and sampling site.

Site	Latitude	Longitude	Snorkel (Y or N)	If N snorkel, indicate why ⁺	Species, density 1-5 ⁺
TS1	46.01723°	W089.35724	Y	-	none
TS2	46.02471°	W089.33714°	Y	-	BMS-3 CMS-2
MS	46.02536°	W089.33786°	-	-	1-Reed canopy
TS3	46.02519°	W089.33451°	Y	-	2-CMS 3-BMS
TS4	46.01304°	W089.34026°	Y	-	1-CMS 3-BMS
TS5	46.01548°	W089.34859°	Y	-	3-BMS
BL	46.00583°	W089.35212°	Y	-	1-CMS

Iris plants found. Unsure if yellow Iris, no bloom.

***For lakes/sites not snorkeled, substitute:**

Boat landing site - 15 rake throws and 15 D-net samples OR 30 minutes, whichever comes first

Targeted site - 5 rake throws and 5 D-net samples OR 10 minutes, whichever comes first

50 meander sites - 10 rake throws and 10 D-net samples during meander survey between sampling sites for a total of 50 meander survey sites

†If lake/site was not snorkeled, indicate why: stained water, turbid water, blue-green bloom, chemical treatment, other (please describe).

‡ Density Ratings

1 – A few plants or invertebrates

2 – One or a few plant beds or colonies of invertebrates

3 – Many small beds or scattered plants or colonies of invertebrates

4 – Dense plant, snail or mussel growth in a whole bay or portion of the lake

5 – Dense plant, snail or mussel growth covering most shallow areas

Step 2: Collect Waterflea Tows from 3 sites: the deep hole (DH) and 2 other sites in water deeper than 15 feet (if possible). Submit sample and Water Flea To Monitoring Reprt form to Science Services.

Site	Depth sampled	Method (hor, obliq, vert)	Net diameter (30 or 50 cm)	Ethanol added (Y or N)	Samples combined (Y or N)	Sample sent to, date
DW	5m	obliq	50cm		Y	
DH	8m	obliq	50cm		Y	
DW	4m	obliq	50cm		Y	

Step 3: Collect Veliger Tows from 3 sites; the deep hole (DH), outlet site (OS), and or downwind site (DS) in water depth of about 4 meters (if possible). Submit sample and Mussel Veliger Tow Monitoring Report form to Science Service.

Site	Depth sampled	Net diameter (30 or 50 cm)	Ethanol added (Y or N)	Samples combined (Y or N)	Sample sent to, date

Step 4: Were plant voucher specimens submitted? Yes No (circle) If yes, where? (circle) Freckmann Herbarium, Other _____

Step 5: Were snail voucher specimens submitted (separate into Chinese, banded, all others)? Yes No (circle) If yes, where? (circle) UW La Crosse, or Other _____

Step 6: Data was entered into SWIMS on _____ by _____

Step 7: Data was proofed on _____ by _____

Notes:
