Exotic Species Annual Monitoring Report

Dear Mr. Boergers:

This report presents the results of monitoring undertaken in August of 2000. On August 10, Dell Siler a fish biologist with the Michigan Department of Natural Resources and Dan Graff, an employee of the City of Crystal Falls, canoeed the shoreline from a point approximately 1.5 miles upstream of the dam down to the boat landing on the eastern shore of the impoundment. Areas between the boat landing and Fairbanks Road were visually inspected from the shore.

No individual or populations of either loosestrife or Eurasian water milfoil were found.

We hereby file one original and eight copies of this letter with the Commission. A copy of this report is also being submitted to Michigan Department of Natural Resources and U.S. Fish and Wildlife Service.

Sincerely,

Angelo DiIqui
