Exotic Species Annual Monitoring Report

Dear Ms. Magalie R. Salas:

On July 25, 2007, Crystal Falls city employee Dave Graff and MDNR's fisheries biologist Arnold Abramson canoed the shoreline from a point approximately 1.5 miles upstream of the dam down to the boat landing on the eastern shore of the impoundment. Areas between the boat landing and Fairbanks Road were visually inspected from the shore.

No individual or populations of either loosestrife or Eurasian water milfoil were found.

We hereby file one original and eight copies of this letter with the Commission. A copy of this report is also being submitted to Michigan Department of Natural Resources and U.S. Fish and Wildlife Service.

Sincerely,

Dave Graff
