Exotic Species Annual Monitoring Report

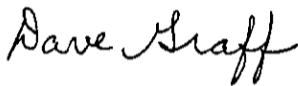

Dear Ms. Magalie R. Salas:

On June 27, 2013, Crystal Falls city employee Dave Graff monitored the shoreline with a boat from a point approximately 1.5 miles upstream of the dam down to the boat landing on the eastern shore of the impoundment. Areas between the boat landing and Fairbanks Road were visually inspected from the shore. Typically this would have been done in late July. However the pond was emptied for dam improvements in July and August. Consequently the float was done earlier than usual while water was still in the pond.

No individual or populations of either loosestrife or Eurasian water milfoil were found.

We hereby file one original and eight copies of this letter with the Commission. A copy of this report is also being submitted to Michigan Department of Natural Resources and U.S. Fish and Wildlife Service.

Sincerely,

Dave Graff
