Whiting Hydroelectric Project, FERC No. 2590 – Article 407, Purple Loosetrife Monitoring Biennial Report – 2006/2007

Dear Ms. Salas:

In accordance with the order approving and modifying the Purple Loosetrife Monitoring Report, Consolidated Water Power Company (CWPCo) is filing the biennial report on the last two years monitoring efforts.

CWPCo conducted monitoring during the summers of 2006 and 2007 while the plants were in full bloom. Inspections were completed by vehicle and boat (where necessary). Smaller colonies were cut and sprayed in accordance with a recently approved modification to Article 407. The proper WDNR permit was received prior to commencing any chemical treatment activities. CWPCo distributes information regarding invasive species via its recreational brochure which is free to the public.

Previous monitoring identified two small sites on islands within the project boundary. These are identified on the attached map as sites number one (1) and two (2). Both sites were less than fifteen plants. The same sites were observed in 2006. No other sites were observed.

Sincerely,

CONSOLIDATED WATER POWER COMPANY

Mark E. Anderson
Resources Manager
