

**We Energies**  
**2010 Annual Report - Nuisance Plant Control Survey**  
**Pine Reservoir**  
**FERC Project #2486**

We Energies' Environmental Department staff, Mr. Mike Grisar and Mr. Scott Horzen, conducted a survey from a boat of the entire shoreline at the Pine Reservoir project on August 5, 2010. All waters and appropriate wetlands accessible from the boat were evaluated. Those species targeted for the survey included purple loosestrife (*Lythrum salicaria*) and Eurasian water milfoil (*Myriophyllum spicatum*). The visual meander survey included areas of shallow water adjacent to the shorelines. Shallow water was surveyed to a point where the water depth and clarity excluded visibility conducive to observing submerged vegetation.

No stands of Eurasian water milfoil or purple loosestrife were observed along the shores of the Pine Reservoir in 2010.
