---

Hi Ashley,

This was one of the Directed Lakes from 2016. We will not sample again in 2017. We support listing as impaired after 1 year of data collection.

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

**Subject:** RE: Ludden WQ?

Yes, I support listing it. Every time I've seen this lake, it's extremely turbid. It's right outside Mineral Point, surrounded by steep hills. The immediate hills are wooded, but much of the watershed is ag. The max Secchi depth since 2002 has been 2.5'. I am sure this lake clearly exceeds.

**We are committed to service excellence.**

Sue, can you do your biologist thing and make the recommendation to Katie below? Thanks!

Hi Jeanne,

Ludden Lake clearly exceeds all criteria after 1 year of sampling. I recommend not sampling this year if you support putting it on the impaired waters list with 1 year of data.

Katie

Hi Katie,

I thought I had an email regarding whether or not we need another year of water chemistry for Ludden, but I can't find it or the right spreadsheet to check. Can you, please let me know when you have time.

Thanks, Jeanne
